December 23, 2016

The Honorable Larry Hogan, Governor

Maryland Lottery and Gaming Control Commission

INTRODUCTION

We are pleased to present to you the Comprehensive Annual Financial Report (CAFR) of the Maryland Lottery and Gaming Control Agency (MLGCA) for the fiscal years ended June 30, 2016, and June 30, 2015. This report has been prepared by the Accounting Department of the MLGCA. Responsibility for both the accuracy of the financial data and the completeness and fairness of presentation, including all disclosures, rests solely with the MLGCA. To the best of our knowledge and belief, the enclosed data is accurate and is reported in a manner designed to present fairly the financial position, results of operations and cash flows of the MLGCA. All disclosures necessary to enable the reader to gain an understanding of the MLGCA's financial activities have been included.

Presented in this report is information about the MLGCA, an independent agency of the State of Maryland. The MLGCA was established by the Maryland General Assembly through the enactment of Chapter 365 of Laws of Maryland of 1972 and the voters' approval that same year of a constitutional amendment. The amendment was ratified on November 7, 1972, and operations commenced on January 2, 1973. During the 2007 special session of the Maryland General Assembly, Chapter 4 was enacted relating to the legalization of Video Lottery Terminals (VLTs; essentially slot machines) in the State subject to the passage of a voters' constitutional referendum. In 2008, voters approved the installation of up to 15,000 VLTs at five casinos in the State. On August 14, 2012, Senate Bill 1 – Gaming Expansion – Video Lottery Terminals and Table Games – passed the 2012 Second Special Session of the Maryland General Assembly. This bill contained many provisions concerning gaming operations and certain provisions that were subject to voter referendum. The provisions that were subject to voter referendum passed during the November 6, 2012 election and allowed for a sixth casino, increased the number of VLTs allowed in the State from 15,000 to 16,500, established table games and allowed for 24/7 casino operations. The MLGCA, in conjunction with a seven-member Commission, administers the gaming program while also managing lottery operations. The MLGCA is an enterprise fund of the State and is included in the State's Comprehensive Annual Financial Report. MLGCA activity is reported as a major enterprise fund type and includes all activity for which the MLGCA is financially accountable.

This letter of transmittal is designed to be read in conjunction with the complementary information offered in the Management's Discussion and Analysis (MD&A), which can be found immediately following the independent auditors' report.

The MLGCA is operated as a business enterprise within the framework of State laws and regulations. Its primary mission is to generate revenue for the State, both through the sale of traditional lottery products and through the administration of the casino gaming program. The MLGCA fulfills this mission by offering the sale of both draw games and instant tickets as described further on pages 17 through 22. Since its inception in 1973, traditional lottery sales have exceeded \$43.3 billion and have contributed \$15.0 billion in revenue to the State. The majority of the revenue from the traditional lottery is contributed to the State's General Fund and is used to support various programs and services, such as education, public health and safety, human resources and the environment. In addition, the MLGCA is required by statute to contribute a defined amount of traditional lottery revenue each year to the Maryland Stadium Authority and 10% of the ITLM revenue to the Veterans Trust Fund. Throughout the years, lotteries have evolved and have become more diversified, offering players a variety of choices. Today, 44 states and the District of Columbia operate lotteries selling both draw games and instant tickets. During fiscal year 2016, these lotteries generated \$73.3 billion in sales nationwide. The Maryland Lottery ranked ninth among state lotteries in per capita sales during this time period.

The mission of the casino gaming program is both to generate revenue for the State of Maryland and to create good-paying jobs, while maintaining integrity, security, transparency and fair play. Since the inception of the gaming program in 2011, video lottery gross terminal revenues generated by the casinos total in excess of \$2.8 billion. Since the inception of table games in fiscal year 2013, revenues generated from table games total \$1.1 billion. The distribution of gaming revenue is directed by statute and described more fully on page 57 of this report. Today, eight state lotteries have the responsibility of regulating casino operations. During fiscal year 2016, casinos regulated by lotteries generated \$3 billion in government revenues in their respective states.

ECONOMIC OUTLOOK AND MLGCA PRODUCTS

Please see Appendix A on page 14 for Maryland's Bureau of Revenue Estimates economic outlook and Appendix B on page 17 for MLGCA products, both of which are an integral part of this transmittal letter.

HIGHLIGHTS OF FISCAL YEAR 2016

In fiscal year 2016, the MLGCA contributed more than \$1.08 billion to the State of Maryland to support good causes, such as the Maryland Education Trust Fund; public health and safety; small, minority and women-owned businesses; horse racing; veterans' organizations; and more. \$569.8 million was generated by the Lottery and \$510.0 million was generated by the casinos.

TRADITIONAL LOTTERY

Instant ticket sales set an all-time record in 2016, totaling \$611.3 million, an increase of \$65.2 million (12.0 percent) over 2015. The Lottery continued to leverage both the popularity of national

entertainment brands and consumer affinity for Maryland-based institutions to drive growth in scratch-off games. In fiscal year 2016, the Lottery partnered with the Baltimore Ravens for the seventh consecutive year to release, for the first time, two different price-point Ravens-themed scratch-off games, as well as a second-chance contest offering exclusive prizes including season tickets and away game trips with the team. The Lottery also introduced the Crab Cash scratch-off which offered players second-chance prizes for trips to Ocean City and Baltimore's Inner Harbor, as well as Home Run Riches which provided players a chance to win cash in conjunction with home runs hit by the Baltimore Orioles. In terms of national brands, the lottery launched instant games with such well-known brands as The Price Is Right, The Walking Dead and Monopoly.

Other significant product and sales initiatives were highlighted by the record \$1.6 billion Powerball jackpot that captured the attention of Marylanders as well as the entire United States and the world. Record Powerball sales in fiscal year 2016 reflect the fervor associated with this unprecedented jackpot.

On the heels of the record jackpot, in late January 2016, the Maryland Lottery became the fifth state to launch Cash4Life, a draw game offering players the chance to win a top-tier prize of \$1,000 a day for life and a second prize of \$1,000 a week for life.

Short-term product promotions were executed across all draw and monitor games during the course of fiscal year 2016 to boost sales by rewarding players with second-chance contests and other prizes.

CASINOS

Maryland's casino industry continued to grow and set revenue and contribution records in fiscal year 2016, spurred on by MLGCA-approved floor expansions and periodic adjustments to the VLT and table game mix at each property.

RESPONSIBLE GAMING

Maryland's commitment to responsible gaming is integral to all we do on both the Lottery and Gaming sides of the business. Since joining the World Lottery Association (WLA) in 2015, Maryland has achieved Responsible Gaming Level 1 and Level 2 Certification, and we are on pace to apply for Level 3 certification in the Spring of 2018. The MLGCA maintains a Voluntary Exclusion Program (VEP) for those individuals who choose to exclude themselves from Maryland casinos and Maryland's traditional lottery games. In addition, in 2016 we introduced a VEP for Maryland's six largest bingo halls that offer electronic bingo machines for patrons. We continue to maintain a highly productive dialogue with the State's responsible gambling treatment community through our leadership of the Maryland Alliance for Responsible Gambling (MARG).

FINANCIAL INFORMATION

ACCOUNTING SYSTEMS AND POLICIES

The MLGCA operates enterprise activities, which include sales of instant and draw game tickets, ITLMs, the oversight of gaming operations and the related support functions: personnel, finance, administration, marketing, security, information technology and licensing. No general government

functions or operations are managed by the MLGCA or included in this report. The MLGCA, like a private business, utilizes the full accrual basis of accounting in accordance with accounting principles generally accepted in the United States of America. Under the accrual basis of accounting, revenues are recognized when earned, and expenses are recognized at the time the related liabilities are incurred.

BUDGETARY SYSTEMS AND CONTROLS

Budgetary control for all State agencies is maintained through the Governor's approval and the enactment of the State's budget by the General Assembly. Each year, the MLGCA submits its budget to the Governor for approval. The budget includes all costs to operate the traditional lottery and to oversee gaming operations. Excluded from the budget are lottery prizes paid to winners, commissions paid to lottery retailers and commissions paid to casino operators. Lottery prizes and commissions are funded from the sale of lottery tickets and are not included as part of the annual budget submitted for approval. Commissions paid to the casino operators are funded from the VLT and table game revenue.

The Governor, in turn, submits the budget for the entire State (including the MLGCA's budget) to the General Assembly for enactment. The MLGCA's official budget, as enacted by the General Assembly, is divided among the various divisions within the MLGCA. These divisions are responsible for monitoring expenditures within their division in order to ensure expenditures do not exceed the amount budgeted. Encumbrance accounting is utilized whereby purchase orders, contracts and other commitments are treated as expenditures for budgetary purposes. The MLGCA's Budget Department is responsible for monitoring the entire budget, including the budgeted funds allocated to the various divisions, in order to ensure that the total expenditures (including encumbrances) do not exceed the approved budget without first obtaining the approval of the Governor and the General Assembly.

DEBT ADMINISTRATION

The MLGCA's long-term liabilities are primarily payments owed to jackpot and lifetime winners and capital lease obligations. The payments due to winners are fully funded by amounts invested primarily in United States Government Agency Obligations (coupon bonds). Some investments also are held in annuity contracts. Capital lease obligations are for video lottery terminals leased through the VLT manufacturers.

INTERNAL CONTROL ENVIRONMENT

Management of the MLGCA is responsible for establishing and maintaining an internal control structure designed to ensure that assets are protected from loss, theft or misuse and to ensure that the accounting system allows compilation of accurate and timely financial information. The structure is designed to provide reasonable assurance that these objectives are met.

To enhance controls over accounting procedures, the MLGCA has segregated the following functions: personnel, payroll, purchasing, accounts payable, accounts receivable and general ledger accounting. Data input and processing are separate from system programming with management providing approval and oversight. In addition, an internal auditor reviews all areas of the MLGCA and reports jointly to the Director and to the Commission.

Since the MLGCA manages instant tickets, controls the disbursement of lottery prizes and is responsible for the oversight of the casinos, the following steps have been taken to ensure the operations remain secure and meet the highest ethical standards:

- employing specialized compliance staff who are present at the casinos on a 24-hours-a-day/7-days-a-week basis;
- maintaining secure facilities and limiting access to them;
- performing background checks on retailers, vendors, employees and anyone requiring a gaming license;
- printing lottery tickets with special security features;
- performing unannounced inspections at the drawing studio to ensure compliance with established operating procedures;
- processing daily transactional data of all vendor activity by MLGCA personnel using internal control system programs and reconciling transactions to reports generated by the online lottery gaming vendor;
- comparing, on a daily basis, gross terminal revenue recorded on the MLGCA's central system to gross terminal revenue reported by the casinos' slot accounting systems, and reconciling any differences;
- employing auditors at the casinos to ensure table game revenue is accurately accounted for and that the casinos are adhering to the required internal controls; and
- providing a variety of access and other controls in the MLGCA's computer systems.

The MLGCA has 338 employees, including contractual employees. The drawing studio is located at the broadcast facility of a television station located in Baltimore, Maryland, which produces various draw game nightly drawings. Keno and Racetrax drawings are conducted by random number generators and are maintained and secured at the lottery draw game vendor's office located in Baltimore, Maryland. Mega Millions and Powerball drawings are held in Georgia and Florida, respectively. Cash4Life drawings are held in New Jersey.

FUTURE PROJECTS

Fiscal year 2017 will be a challenging year for the MLGCA as it strives to exceed the high level of State contributions achieved in fiscal year 2016. Listed below are a few projected highlights for fiscal year 2017.

TRADITIONAL LOTTERY:

A variety of tactics will be employed in the year ahead to meet the challenge.

The Lottery will continue to evaluate opportunities to leverage known entertainment brands as instant game products and is launching a new high price point \$30 scratch-off game in February 2017. \$30 tickets have proven to be successful in many other Lottery jurisdictions.

An update to the Maryland Lottery mobile application (app) allows players to check whether the tickets they purchased at retail are winners by scanning them with a smartphone. Further, players are

now able to search the app to find retail locations near them and to fill out an “e-playslip” that can be presented on their phone at retail to purchase draw games.

CASINO GAMING:

The MLGCA’s newest, and potentially largest, casino opened on December 8 to enormous crowds and tremendous media attention. The MGM National Harbor casino includes 3,300 slot machines, 167 table games, a 3,000-seat theater, a 300-room hotel and multiple celebrity chef food outlets and retail stores, with total employment nearing 4,000. The addition of MGM will likely generate a new record in fiscal year 2017 contributions to the State from the gaming business unit of MLGCA.

Additionally, fiscal year 2017 is expected to see approved expansions for Horseshoe Baltimore and Rocky Gap, as well as initial construction of a new hotel adjacent to the Maryland Live! Casino in Anne Arundel County.

Ownership of the Ocean Downs Casino in Worcester County is expected to change hands from Ocean Enterprises 589, LLC and Racing Services LLC to Old Bay Gaming and Racing early in calendar year 2017.

RESPONSIBLE GAMING

In fiscal year 2017, the MLGCA will apply for national certification from the North American Association of State and Provincial Lotteries (NASPL) for its Responsible Gaming Verification Program developed in collaboration with the National Council on Problem Gambling. As noted earlier, we are also on pace to qualify for Level 3 certification from the World Lottery Association’s responsible gaming program.

INDEPENDENT AUDIT

The MLGCA has contracted with an independent certified public accounting firm to perform an annual audit of the MLGCA. The independent auditors’ opinions on the MLGCA’s financial statements and internal controls are included in the financial section of this report.

CERTIFICATE OF ACHIEVEMENT

The Government Finance Officers Association (GFOA) awarded a Certificate of Achievement for Excellence in Financial Reporting to the MLGCA for its CAFR for the fiscal year ended June 30, 2015. This marked the eleventh consecutive year the MLGCA received this prestigious national award. In order to be awarded a Certificate of Achievement, a governmental unit must publish an easily readable and efficiently organized CAFR. This report must satisfy both generally accepted accounting principles and applicable legal requirements.

A Certificate of Achievement is valid for a period of one year only. The MLGCA believes its current CAFR continues to meet Certificate of Achievement Program requirements and is submitting it to the GFOA to determine eligibility for another certificate.

ACKNOWLEDGEMENTS

The preparation of this report could not have been accomplished without the efficient and dedicated services of the Accounting Department. A special note of thanks is also given to the MLGCA's Creative Services Division and current creative services partner for assisting in the layout of this report; Andrew Schaufele, Director of the State's Bureau of Revenue Estimates, for his assistance in providing information concerning the Maryland economy; and the MLGCA's independent auditors for providing assistance in developing this report.

This Comprehensive Annual Financial Report reflects the MLGCA's commitment to maintaining its financial statements and record-keeping systems in conformance with the highest standards of accountability.

Respectfully Submitted,

MARYLAND LOTTERY AND GAMING CONTROL AGENCY

Gina M. Smith, CPA
Deputy Director and Chief Financial Officer

Gordon Medenica
Director

APPENDIX A: THE ECONOMIC OUTLOOK

Maryland's economic growth between 2012 and 2016 has been tepid at best, particularly relative to national growth. This coincides with federal budget sequestration. The private sector began to adjust payrolls immediately, even as the bill was being discussed in Congress. Actual austerity measures did not take effect until 2013, at which point the private and public sectors took another hit. The following chart illustrates the relative weakness of Maryland's recovery over this period compared to the national recovery, a clear indication of the relative fiscal drag.

The chart on the following page may help to illustrate the timing of the impacts and might even offer a glimmer of hope. The data is somewhat esoteric, even for most economists, but it shows the growth in the value of intermediate inputs purchased by the federal government. Intermediate inputs represent the value of the private sector's sales to the federal government, an important component to Maryland's economy. While this data is not Maryland specific, we are far more affected than any other jurisdiction outside of Virginia and the District of Columbia.

As the above chart shows, the worst impact of the sequester may be behind us. The decline in the value of intermediate inputs purchased by the Federal Government leveled out at around the same time Maryland's economy returned to growth. That said, the sector will continue to be a drag. The sequester targets will restrain growth in discretionary spending until 2019; therefore, an important sector of our economy will remain handicapped. As such, Maryland's economic trajectory should remain tepid relative to the national rate until either sequester is lifted or the next recession.

This will also be a possible positive risk to this forecast. Federal sequestration did close to nothing to fix the federal fiscal quagmire. In fact, it may have had a negative effect; the economic impact of the half-measures reduced economic growth without solving longer-term spending issues. The real issues for the federal fiscal outlook are entitlements (also related to demographics). Should Congress address the real problem, and ameliorate or remove the sequester altogether, Maryland will grow at a higher trajectory.

THE MARYLAND OUTLOOK

Maryland's economy has expanded in 2016 and growth in employment is expected to rise to 1.6% from 1.5% in 2015. Employment growth in 2017 is expected to slow as a result of the economy reaching full employment. Growth in the average wage for 2016 is expected to equal 1.7%, a somewhat disappointing factor. In addition to the reasons that have been discussed throughout this summary, there appear to have been timing issues, such as an extra pay period at the end of 2015, that inflated average wage growth in 2015 (of 3.0%) at the expense of reported wage growth in 2016. The rate of wage growth is expected to increase throughout the out years as the labor market tightens and workers gain experience, but to be sure, the expected rate of wage growth is low relative to historical norms. Aggregate wage growth and personal income measures increase as employment and the average wage improves. The outlook for the largest general fund revenue source, the income tax, is relatively strong. This is due to Maryland's strong concentration of wealthy taxpayers. As has been noted, income growth at the higher end has been substantial (volatile as well), buoying aggregate receipts to growth rates of 4.9% fiscal year to date.

Real estate and construction are relative bright spots in the recent history and outlook. The number of houses in foreclosure continues to decrease, while sales have been strong. The median existing house price has been stagnant or declining in the past two years but is up 3.4% year to date as of October 2016. Employment in residential construction grew 4.7% in 2015 and is trending upwards. Sales and Use Tax (SUT) receipts point to strength in the construction sector as a whole. In fiscal year 2016, SUT receipts from the construction sector grew by 4.4%, following growth of 6.0% in fiscal year 2015.

Inflation has been historically low since the Great Recession, and driven lower more recently by falling oil prices. As measured by the Consumer Price Index, inflation, near zero for most of 2015, has risen above 1.5% as of October 2016. All else equal, lower inflation would mean lower nominal wage growth, as employers do not need to increase nominal wages by as much to keep up with inflation. An increase in inflation would mean faster nominal wage growth, and therefore income tax revenues, than would otherwise be the case. Increasing nominal prices could, by the same logic, lead to faster growth in nominal SUT revenue. When all else is not equal, the net effect can depend on

the source of inflation. If the source is negative supply shock, such as during the 1970s oil price spike, real growth, and ultimately tax collections, may be harmed.

Outlook For Key Maryland Economic Variables				
Calendar Year	Non-Farm Employment Growth	Personal Income	Aggregate Wage & Salary Income	Average Wage
2014	0.9%	3.4%	3.3%	2.4%
2015	1.5%	4.1%	4.6%	3.0%
2016E	1.6%	3.3%	3.3%	1.7%
2017E	1.0%	4.0%	3.9%	2.9%
2018E	0.8%	4.2%	4.0%	3.2%
2019E	0.5%	4.1%	3.8%	3.2%
2020E	0.6%	4.1%	4.0%	3.4%
Source: Bureau of Revenue Estimates				

RISKS

With the recent rate hike, there is a risk that the market reacts in a negative manner that gains traction or that the higher rates slow broader growth in such a way that the economy again falters. Oil prices have created a sort of consumer dividend, and while low prices seem to have some traction for an extended period of time, higher prices would be a sharp drag to the average consumer.

Positive risks include the aforementioned reduction or abolition of federal sequester, but also expansion from the Port of Baltimore. The Panama Canal widening, which will allow so called “post-Panamax ships” to navigate the Canal, will permit large cargo ships to move from Asia to the East Coast. Currently that cargo is typically delivered to the West Coast and then transported by rail and road throughout the country. Baltimore is one of the few ports with the depth and infrastructure to handle these types of ships and will certainly see increased need for labor and capital. Should there be a meaningful surge in activity and jobs, there will also be indirect and induced impacts.

Source: Andrew Schaufele, Director, Maryland Bureau of Revenue Estimates

APPENDIX B: MARYLAND LOTTERY PRODUCTS

The MLGCA has introduced a number of different traditional lottery games since its inception and continues to provide players with the opportunity to participate in a variety of draw and instant ticket games. Draw games allow players to pick their numbers or utilize automatic computer-generated plays. Customers receive a ticket and then wait for the drawing to determine if they have won. Instant games are played by scratching a latex covering off a play area to reveal pre-printed combinations. If a winning combination appears, the customer is an instant winner. Instant Ticket Lottery Machines give players the same experience of playing an instant ticket but through a machine.

Lottery games offered during fiscal year 2016 included the following:

FISCAL YEAR 2016 STATISTICS — POWERBALL:

\$137.1 million in net sales

7.2% of total net sales

\$52.3 million increase from fiscal year 2015 Powerball net sales

FISCAL YEAR 2016 STATISTICS — POWER PLAY:

\$6.4 million in net sales

0.3% of total net sales

\$1.7 million increase from fiscal year 2015 Power Play net sales

POWERBALL® is a multi-state Jackpot draw game. The MLGCA began selling Powerball/Power Play in January 2010. Currently, 47 lotteries sell Powerball/Power Play. The base price of Powerball is \$2 and has a starting Jackpot of \$40 million. In Powerball, players choose or request the computer to generate a total of six numbers from two different fields. Players pick five numbers from a field of 59 and one Powerball from a field of 39. Players matching all numbers and the Powerball win the Jackpot. If there are multiple winners, the Jackpot prize is divided evenly among all winners. The odds of winning the jackpot are 1 in 176 million. Players also can win prizes ranging from \$4 to \$1 million. **POWER PLAY®** is a special feature of Powerball that allows a winner to increase their original Powerball prize amount. For an extra \$1, Powerball players can win \$12 to \$2 million. Drawings are held on Wednesday and Saturday evenings.

FISCAL YEAR 2016 STATISTICS — MEGA MILLIONS:

\$67.2 million in net sales

3.5% of total net sales

\$8.6 million decrease from fiscal year 2015 Mega Millions net sales

FISCAL YEAR 2016 STATISTICS — MEGAPLIER:

\$6.0 million in net sales

0.3% of total net sales

\$197 thousand decrease from fiscal year 2015 Megaplier net sales

MEGA MILLIONS® is a multi-state Jackpot draw game. The MLGCA began selling Mega Millions in September 1996. Currently, 46 lotteries sell Mega Millions. In October 2013, Mega Millions changed its matrix to give players better odds of winning any prize. The overall odds of winning any prize are 1 in 15. While players still select five white balls and one Mega ball, the number of white balls available to select from increased to 75, up from 56, and the number of Mega balls available to select from decreased to 15, down from 46. Jackpots now start at \$15 million, up from the previous \$12 million, and grow by a guaranteed \$5 million per draw. Players matching all numbers and the Mega ball win the Jackpot. If there are multiple winners, the Jackpot prize is divided evenly among the winners. The odds of winning the Jackpot are 1 in 259 million, up from 1 in 175 million. A second tier prize of \$1 million is now available, up from the previous \$250,000. Megaplier, a special feature that allows players to multiply their non-Jackpot winnings for an extra \$1, also changed. Players can now multiply their non-Jackpot winnings by 5 times, meaning they can win up to \$5 million. Winnings can still be multiplied by two, three or four as previously offered. Drawings are held on Tuesday and Friday evenings.

FISCAL YEAR 2016 STATISTICS:

\$31.1 million in net sales

1.6% of total net sales

\$3.4 million decrease from fiscal year 2015 Multi-Match net sales

MULTI-MATCH® is a Jackpot draw game that was introduced in February 2006, replacing Lotto, the MLGCA's original in-state Jackpot game. Players receive three lines of six numbers. Players choose or request the computer to generate the first line of numbers from a field of 43. The computer then generates the remaining two lines of numbers. Players matching all six numbers in a single line, in any order, win the Jackpot, which typically starts at \$500,000 and increases after each drawing, if not won. If there are multiple winners, the Jackpot is divided by the number of winners. Players can also win fixed prizes ranging from \$2 to \$3,000 by matching three or more numbers in a single line or five or more numbers in the combined lines. Multi-Match drawings are held on Monday and Thursday evenings.

FISCAL YEAR 2016 STATISTICS:

\$12.0 million in net sales

0.6% of total net sales

CASH4LIFE® is a multi-state draw game. The MLGCA began selling Cash4Life in January 2016. Currently, eight lotteries sell Cash4Life. For \$2, players pick five numbers from 1 through 60 and one Cash Ball from 1 to 4. Players matching all five numbers drawn and the Cash Ball could win top prize of \$1,000 a day for life and players who match the five numbers drawn but no Cash Ball could win \$1,000 a week for life. In all, there are nine different ways to win varying levels of cash prizes. The overall approximate probability of winning any prize is 1 in 8. Cash4Life drawings are held Monday and Thursday evenings.

FISCAL YEAR 2016 STATISTICS:

\$241.6 million in net sales

12.7% of total net sales

\$659 thousand increase from fiscal year 2015 Pick 3 net sales

PICK 3 was introduced in July 1976 and was the first draw game offered. Players choose three numbers from zero to nine for the chance of winning prizes ranging from \$25 to \$500. Drawings are held twice daily, seven days a week.

FISCAL YEAR 2016 STATISTICS:

\$280.8 million in net sales

14.7% of total net sales

\$3.8 million increase from fiscal year 2015 Pick 4 net sales

PICK 4 was introduced in April 1983. Players choose four numbers from zero to nine for the chance of winning prizes ranging from \$100 to \$5,000. Drawings are held twice daily, seven days a week.

FISCAL YEAR 2016 STATISTICS:

\$20.6 million in net sales

1.1% of total net sales

\$709 thousand decrease from fiscal year 2015 Bonus Match 5 net sales

BONUS MATCH 5 is a draw game that was originally introduced in September 1995. The game was discontinued in January 1998 and re-introduced in February 2002. Players select or request the computer to generate five numbers from a field of 39. Players matching all five numbers, in any order, win \$50,000. In the event that there are more than 12 \$50,000 winners in one drawing, each winner will receive an equal share of the \$600,000 prize pool. Players also may win prizes ranging from \$2 to \$600. Drawings are held seven nights a week.

FISCAL YEAR 2016 STATISTICS:

\$5.9 million in net sales

0.3% of total net sales

\$620 thousand decrease from fiscal year 2015 5 Card Cash net sales

5 CARD CASH is a draw game that launched statewide in November 2012. Players receive a \$2 ticket featuring five randomly selected cards from the standard deck of 52 playing cards. Players can win instantly if their cards show a poker hand of a pair of jacks or better. Players can win from \$3 to \$100,000. Players have a second chance to win if they match two, three, four or five randomly drawn cards in drawings held seven days a week.

FISCAL YEAR 2016 STATISTICS:

\$161.3 million in net sales

8.5% of total net sales

\$3.0 million increase from fiscal year 2015 Keno net sales

KENO is a draw game that is predominantly played in a social atmosphere, and drawings are held every four minutes. Keno was introduced in January 1993. A computer generates random sets of 20 numbers for each draw. These numbers are then displayed on a monitor. Players select from one to 10 numbers from a field of 80 numbers and win prizes ranging from \$2 to \$100,000 by matching anywhere from zero numbers to 10 numbers.

FISCAL YEAR 2016 STATISTICS:

\$32.1 million in net sales

1.7% of total net sales

\$744 thousand increase from fiscal year 2015 Keno Bonus net sales

KENO BONUS® is a draw game that was introduced statewide in April 1999 and is sold in conjunction with Keno. By matching a Keno wager, players have an opportunity to multiply their winnings by three, four, five or 10. The multiplier is determined by a computer-generated wheel that is spun prior to each drawing. The maximum prize that can be won per game on any one Keno ticket when Keno Bonus is played is \$1 million.

FISCAL YEAR 2016 STATISTICS:

\$118.2 million in net sales

6.2% of total net sales

\$4.9 million increase from fiscal year 2015 Keno Super Bonus net sales

KENO SUPER BONUS™ is a draw game that was introduced in June 2009 and is sold in conjunction with Keno. The amount of the Keno Super Bonus wager is twice the amount of the Keno wager. By matching a Keno wager, players have an opportunity to multiply their winnings by two, three, four, five, six, 10, 12 or 20. The multiplier is determined by a computer-generated wheel that is spun prior to each drawing and is part of the Keno Bonus wheel. The maximum prize that can be won on any Keno ticket when Keno Super Bonus is played is \$2 million.

FISCAL YEAR 2016 STATISTICS:

\$145.8 million in net sales

7.7% of total net sales

\$10.9 million increase from fiscal year 2015 Racetrax® net sales

RACETRAX® is a draw game that launched statewide in August 2006. The game is predominantly played in a social atmosphere, and drawings are held approximately every four and a half minutes. This game is a computer-animated monitor game that offers the thrill of horse racing with advanced 3-D graphic animation that results in the horses and races appearing realistic. Players select from one to 12 horses to win prizes ranging from \$1.20 to \$31,454.

FISCAL YEAR 2016 STATISTICS:

\$21.3 million in net sales

1.1% of total net sales

\$1.5 million increase from fiscal year 2015 Racetrax® Bonus net sales

RACETRAX® BONUS is a draw game that was launched statewide in August 2009 and is sold in conjunction with Racetrax. By matching a Racetrax wager, players have an opportunity to multiply their winnings by three, four, five or 10. The multiplier is determined by a computer-generated wheel that is spun prior to each drawing. The maximum prize that can be won per game on any Racetrax ticket when Racetrax Bonus is played is \$3.15 million.

FISCAL YEAR 2016 STATISTICS:

611.3 million in net sales

32.1% of total net sales

\$65.2 million increase from fiscal year 2015 Instant Ticket net sales

INSTANT TICKETS, also known as scratch-offs, were first introduced in 1976. Similar to today's instant ticket games, the first instant ticket game launched in Maryland provided players with the opportunity to win by scratching a latex play area. From 1976 to 1985, a limited number of instant tickets games were launched; however, by 1986, instant games were launched on a more frequent basis. During fiscal year 2016, the MLGCA launched 51 new instant ticket games.

**INSTANT
TICKET
LOTTERY MACHINES**

FISCAL YEAR 2016 STATISTICS:

\$6.9 million in net sales

0.4% of total net sales

\$3.1 million increase from fiscal year 2015 ITLM net sales

INSTANT TICKET LOTTERY MACHINES (ITLMs) were introduced in September 2014 and placed at qualified veterans' organizations. The ITLM is an electronic device that dispenses pre-printed instant scratch tickets and utilizes a touchscreen monitor. The device accumulates winnings for the player and prints out a voucher at the conclusion of play that can be redeemed for cash or inserted into another ITLM for continued play.

MARYLAND CASINOS

Maryland casinos offered the following during fiscal year 2016:

Video Lottery Terminals (Slot Machines)

FISCAL YEAR 2016 STATISTICS:

\$741.7 million in gross terminal revenue

8,409 total video lottery terminals as of June 30, 2016

\$59.9 million increase from fiscal year 2015 gross terminal revenue

VIDEO LOTTERY TERMINALS were approved during the 2007 special session of the Maryland General Assembly. As of June 30, 2016, five casinos had opened and 8,409 video lottery terminals were in operation.

TABLE GAMES

FISCAL YEAR 2016 STATISTICS:

\$402.3 million in revenue

424 total table games

\$45.9 million increase from fiscal year 2015 table game revenue

TABLE GAMES became operational in fiscal year 2013 after the Maryland General Assembly passed the Gaming Expansion Act, making table games available to the casinos, subject to the passage of the voter referendum. As of June 30, 2016 there were 424 table games in operation.

INDEPENDENT AUDITORS' REPORT

To the Maryland Lottery and Gaming Control Agency:

REPORT ON THE FINANCIAL STATEMENTS

We have audited the accompanying financial statements of the Maryland Lottery and Gaming Control Agency (an agency of the State of Maryland) (Agency), which comprise the statements of net position as of June 30, 2016 and 2015, the related statements of revenues, expenses, and changes in net position, and cash flows for the years then ended, and the related notes to the financial statements.

MANAGEMENT'S RESPONSIBILITY FOR THE FINANCIAL STATEMENTS

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

AUDITORS' RESPONSIBILITY

Our responsibility is to express an opinion on these financial statements based on our audits. We conducted our audits in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

OPINION

In our opinion, the financial statements referred to above present fairly, in all material respects, the net position of the Maryland Lottery and Gaming Control Agency as of June 30, 2016 and 2015 and its changes in net position and its cash flow for the years then ended in accordance with accounting principles generally accepted in the United States of America.

EMPHASIS OF MATTER

As discussed in Note 1, the financial statements of the Agency are intended to present the net position and the changes in net position and cash flows, where applicable, of the Agency. They do not purport to, and do not, present fairly the net position of the State of Maryland as of June 30, 2016 and 2015, and the changes in its net position and its cash flows, where applicable, for the years then ended in conformity with accounting principles generally accepted in the United States of America.

OTHER MATTERS

REQUIRED SUPPLEMENTARY INFORMATION

Accounting principles generally accepted in the United States of America require that the management's discussion and analysis and budgetary comparison information on pages 3 through 19 and 48 through 49, respectively, be presented to supplement the basic financial statements. Such information, although not part of the basic financial statements, is required by the Governmental Accounting Standards Board (GASB), who considers it to be an essential part of financial reporting for placing the basic financial statements in an appropriate operational, economic, or historical context. We have applied certain limited procedures to the required supplementary information in accordance with auditing standards generally accepted in the United States of America, which consisted of inquiries of management about the methods of preparing the information and comparing the information for consistency with management's responses to our inquiries, the basic financial statements, and other knowledge we obtained during our audit of the basic financial statements. We do not express an opinion or provide any assurance on the information because the limited procedures do not provide us with sufficient evidence to express an opinion or provide any assurance.

OTHER INFORMATION

Our audit was conducted for the purpose of forming opinions on the financial statements that collectively comprise the Maryland Lottery and Gaming Control Agency's basic financial statements.

The introductory section and statistical section are presented for purposes of additional analysis and are not a required part of the basic financial statements. These sections have not been subjected to the auditing procedures applied in the audit of the basic financial statements and, accordingly, we do not express an opinion or provide any assurance on them.

OTHER REPORTING REQUIRED BY GOVERNMENT AUDITING STANDARDS

In accordance with *Government Auditing Standards*, we have also issued our report dated September 30, 2016, on our consideration of the Maryland Lottery and Gaming Control Agency's internal control over financial reporting and on our tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements and other matters. The purpose of that report is to describe the scope of our testing of internal control over financial reporting and compliance and the results of that testing, and not to provide an opinion on the internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering the Maryland Lottery and Gaming Control Agency's internal control over financial reporting and compliance.

Stout, Casey & Horning, P.A.

September 30, 2016

The following Management's Discussion and Analysis (MD&A) provides an overview of the Maryland Lottery and Gaming Control Agency's (Agency) performance for the fiscal years ended June 30, 2016 and 2015. As you read the MD&A, 2016 refers to the fiscal year ended June 30, 2016, 2015 refers to the fiscal year ended June 30, 2015 and 2014 refers to the fiscal year ended June 30, 2014. The information contained in the MD&A should be read in conjunction with the information contained in the financial statements and notes to the financial statements, which begins on page 47.

FINANCIAL HIGHLIGHTS

- Net lottery sales were \$1.91 billion in 2016, an increase of \$144.68 million or 8.22% compared to 2015 which increased by \$36.88 million or 2.14% as compared to 2014.
- Gross video lottery terminal revenue (VLT) was \$741.69 million in 2016, an increase of \$59.87 million or 8.78% as compared to 2015 which increased \$102.69 million or 17.73% as compared to 2014.
- Table game revenue was \$402.28 million in 2016, an increase of \$45.88 million or 12.87% compared to 2015 which increased \$101.53 million or 39.84% compared to 2014.
- Cost of sales increased by \$185.53 million or 10.61% in 2016 compared to 2015 which increased \$169.69 million or 10.75% compared to 2014.
- Operating expenses decreased by \$31.11 million or 32.61% in 2016 compared to 2015 which decreased by \$24.09 million or 20.16% compared to 2014.
- Transfers from lottery proceeds to the State of Maryland, the Stadium Authority and the Veterans Trust Fund in 2016 were \$569.81 million, an increase of \$43.29 million or 8.22% as compared to 2015 which increased \$5.42 million or 1.04% as compared to 2014.
- Transfers to Other Governmental Funds/Agencies totaled \$514.15 million in 2016, an increase of \$14.48 million or 2.90% compared to 2015 which increased \$79.05 million or 18.79% as compared to 2014.

OVERVIEW OF THE FINANCIAL STATEMENTS

The Maryland Lottery and Gaming Control Agency is an independent agency of the State of Maryland (the State) that was created to generate revenue through the operation of a lottery. On November 4, 2008, a constitutional amendment was approved by voters which set up broad parameters for the operations of VLTs and the establishment of five casinos in the State. During the 2012 Second Special Session of the Maryland General Assembly, legislation passed, subject to voter referendum, that allowed, among other things, the implementation of table games as well as a sixth casino. During the November 2012 election, voters approved both table games and the sixth casino. The Agency is responsible for regulating the operations of the casinos. As of June 30, 2016, there were five casinos operating in the State with 8,409 VLTs and 424 table games.

The Agency is accounted for as a proprietary-type enterprise fund using the accrual basis of accounting, similar to a private business entity.

Financial Statements

The financial statements included in this report are: the statements of net position; statements of revenues, expenses, and changes in net position; and statements of cash flows. The statements of net position present the assets and deferred outflows of resources, and liabilities and deferred inflows of resources of the Agency with the difference being reported as net position. The statements of revenues, expenses, and changes in net position report the revenues and expenses of the Agency and are used to measure the success of its operations for a given period of time as it relates to contributions to the State of Maryland and other government agencies. The statements of cash flows reconcile the changes in cash and cash equivalents with the activities of the Agency for the periods presented. The activities are classified as operating, noncapital financing, capital and related financing, and investing.

Notes to the Financial Statements

The notes to the financial statements provide additional information that is essential to the full understanding of the data provided in the financial statements. The notes to the financial statements can be found on pages 51 to 73 of this report.

Implementation of GASB Statement No. 68

The Agency implemented GASB No. 68 – *Accounting and Financial Reporting for Pensions – An Amendment of GASB Statement No. 27* for the fiscal year ended June 30, 2015. Under this statement, the Agency, a cost-sharing employer, is required to recognize a liability for its proportionate share of the State's overall net pension liability. Net pension liability is recorded on the statements of net position as a non-current liability. In addition, the Agency is required to recognize pension expense and report deferred outflows of resources and deferred inflows of resources related to pensions for its proportionate share of collective pension expense and collective deferred outflows of resources and deferred inflows of resources related to pensions. Furthermore, the effects of a change in the Agency's proportion of the collective net pension liability and the differences during the measurement period between the Agency's contributions and its proportionate share of total contributions in the collective net pension liability are to be recorded as pension expense. The proportions of the effect not recognized in pension expense are reported as deferred outflows of resources or deferred inflows of resources related to pensions. In order to record the Agency's share of the State's pension liability, the Agency's net position has been retroactively adjusted for all periods presented in this MD&A.

FINANCIAL ANALYSIS

Table 1 is a summarized version of the statements of net position as of June 30, 2016, 2015 and 2014. The table reflects the Agency's overall change in financial resources and claims on those resources. The majority of the assets consist of cash held by the State Treasury, investments, accounts receivable and net capital assets. The Agency's investments and the majority of accounts receivable, as well as the majority of cash held by the State Treasury, are used to pay lottery winners or are transferred as income to the State of Maryland. The remaining portion of cash held by the State Treasury is gaming revenue that is to be transferred to other government agencies. Most liabilities represent prize awards payables, annuities payable, amounts due to the State of Maryland, amounts due to other government agencies and capital lease obligations.

Table 1 — Net Position (in thousands)

	2016	2015	2014
Current Assets	\$ 209,910	\$ 238,535	\$ 190,342

Current Assets

The Agency's current assets decreased by \$28.63 million or 12.00% in 2016 compared to 2015 which increased by \$48.19 million or 25.32% compared to 2014.

Cash held with State Treasury decreased by \$33.93 million or 17.83% in 2016 compared to 2015 which increased by \$90.52 million or 90.71% compared to 2014. At the end of 2016, there were two months' worth of lottery income waiting to be transferred to the General Fund versus three months of income

Current Assets (continued)

in 2015. At the end of 2015, there were three months of lottery income waiting to be transferred to the General Fund versus one month of income in 2014. In 2015, the increase in Cash held with State Treasury was offset by the decrease in Cash and Cash Equivalents — Gaming Escrow. In 2015, Cash and Cash Equivalents — Gaming Escrow decreased by \$45.34 million or 99.91% compared to 2014. Cash and Cash Equivalents — Gaming Escrow were primarily the funds received from applicants who applied for a casino operator license and to a lesser extent, funds received from entities and individuals seeking to receive a gaming license. Operator license fees were held in this account until they were transferred to the Education Trust Fund or returned to unsuccessful bidders. In 2015, operator licensee fees for the Horseshoe Casino and the MGM casino, the sixth casino to be built, were transferred to the Education Trust Fund.

Accounts receivable increased by \$9.13 million or 27.30% in 2016 compared to 2015 which increased \$2.81 million or 9.18% compared to 2014. Accounts receivable is primarily comprised of amounts due from lottery retailers from the sale of lottery tickets and revenue due from the casino operators. Accounts receivable from lottery retailers increased \$6.20 million or 19.93% in 2016 compared to 2015 which increased \$4.67 million or 17.69% compared to 2014. On a weekly basis, amounts due from retailers are collected electronically from the retailers' bank accounts. In 2016, four days' worth of sales activity was waiting to be collected compared to two days in 2015 and one day in 2014.

Accounts receivable from casino operators increased by \$2.94 million or 126.91% in 2016 compared to 2015 which decreased by \$1.84 million or 44.24% compared to 2014. Gross terminal revenue is electronically transferred to the Agency on a daily basis and table game revenue is electronically transferred to the Agency every two days. Corresponding increases and decreases in accounts receivables from casino operators is a function of the change in gaming revenue for the last days of the fiscal year and timing of when the revenue is received.

The current portion of investments for annuity payments decreased by \$2.67 million or 36.16% in 2016 compared to 2015 which decreased \$3.41 million or 31.61% compared to 2014. The continued decreases during these years resulted from fewer jackpot winners electing to receive their prize in the form of an annuity compared to the number of annuities that expired.

Non-Current Assets

The Agency's non-current assets consist of investments for annuity payments, net of current portion and capital assets, net of depreciation. Non-current assets decreased by \$12.66 million or 13.81% in 2016 compared to 2015 which increased by \$44.90 million or 95.98% compared to 2014.

Capital assets, net of depreciation, decreased by \$13.04 million or 21.11% in 2016 compared to 2015 which increased by \$51.23 million or 486.72% compared to 2014. The decrease in 2016 is attributed to only needing to amortize VLTs for two casinos versus four casinos for the majority of 2015. The increase in 2015 is attributed to the leasing of VLTs at the Casino at Ocean Downs and the Rocky Gap Casino and Resort that qualified as capital leases. The gaming law changed on April 1, 2015 which required

Non-Current Assets (continued)

Maryland Live! Casino and Hollywood Casino Perryville to own/lease their own VLTs. Horseshoe Casino was required to purchase/lease their own VLTs from start up. However, the Agency was still required to own/lease all of the VLTs for the Casino at Ocean Downs and the Rocky Gap Casino and Resort. As such, the Agency entered into various new contracts with several VLT manufacturers for the leasing of the VLTs for these two casinos. These leases contain a purchase option at the end of the five- year term and as such, are treated as capital leases and are capitalized based on the present value of their minimum lease payments and are amortized over a five-year period. Details of capital assets, additions and depreciation are included in Note 4 to the financial statements, on page 63.

The Agency's investments for annuity payments, net of current portion, increased by \$374,000 or 1.25% in 2016 compared to 2015 which decreased by \$6.33 million or 17.47% compared to 2014.

While 2016 remained relatively constant compared to 2015, the decrease from 2015 to 2014 resulted from fewer jackpot winners electing to receive their prize in the form of an annuity compared to the number of annuities that have expired.

Deferred Outflows of Resources

In 2015, the Agency recognized deferred pension outflows as a result of the implementation of GASB Statement No. 68 — *Accounting and Financial Reporting for Pensions — An Amendment of GASB Statement No. 27*. The amount recognized represents the Agency's contributions subsequent to the measurement date and the changes in the Agency's proportionate share of the State Retirement and Pension Funds total pension liability and the changes in actuarial assumptions as described in Note 9 to the financial statements. Deferred outflows increased in 2016 by \$8.88 million or 353.21% from 2015. The increase in 2016 is attributed to the increase in the Agency's proportionate share of the overall pension liability between 2016 and 2015. Deferred outflows remained relatively consistent between 2015 and 2014, increasing by \$712,000 or 39.52% between the two years.

Current Liabilities

Current liabilities decreased by \$31.37 million or 12.96% in 2016 compared to 2015 which increased by \$52.77 million or 27.88% compared to 2014. The majority of the decrease between 2016 and 2015 is related to a decrease in the amount due to the General Fund. This amount decreased by \$33.80 million or 25.65% in 2016 compared to 2015. At the end of 2016, there was two months of lottery income waiting to be transferred to the General Fund versus three months in 2015. The amount due to the General Fund increased by \$95.60 million or 264.30% in 2015 compared to 2014. At the end of 2015, there were three months of lottery income waiting to be transferred versus one month in 2014. In 2015, the increase in the amount due to the General Fund was offset by a decrease in gaming escrow payable. In 2015, gaming escrow payable decreased by \$44.12 million or 99.91% compared to 2014 which decreased by \$31.5 million or 41.60% compared to 2013. The majority of the funds in the gaming escrow payable account were for application fees received from casino operators bidding on casinos. These fees were held in this account until either remitted to the Education Trust Fund or returned to unsuccessful bidders. In 2015,

Current Liabilities (continued)

license fees totaling \$44.1 million, for Horseshoe Casino and the MGM casino, the sixth casino to be built, were transferred to the Education Trust Fund. There was no similar offset between 2016 and 2015.

Non-Current Liabilities

Non-current liabilities decreased by \$11.30 million or 15.13% in 2016 compared to 2015 which increased by \$35.03 million or 88.37% compared to 2014. The decrease in 2016 is attributed to the decrease in capital lease obligations, net of current portion. Capital lease obligations, net of current portion, decreased by \$12.43 million or 26.19% in 2016 compared to 2015. This decrease is attributed to the lease payments made on the VLTs. Capital lease obligations, net of current portion increased by \$39.27 million or 479.31% in 2015 compared to 2014. The increase in 2015 is attributed to the increase in capital lease obligations, net of current portion. The increase in capital lease obligations is attributed to the leasing of the VLTs at the Casino at Ocean Downs and the Rocky Gap Casino and Resort.

Net Pension Liability

Net pension liability increased by \$9.11 million or 66.36% in 2016 as compared to 2015 which decreased by \$1.41 million or 9.30% compared to 2014. The Agency began recognizing net pension liability in 2015 as a result of implementing GASB Statement No. 68 — *Accounting and Financial Reporting for Pensions — An Amendment of GASB Statement No. 27*. The total pension liability represents the Agency's proportionate share of the State of Maryland's total net pension liability. The increase in 2016 is primarily the result of an increase in the Agency's proportionate share of the State Retirement and Pension Funds overall pension liability. The 2014 pension liability was added to the Statement of Net Position for comparative purposes.

Deferred Inflows of Resources

Deferred inflows increased by \$66,000 or 4.39% in 2016 compared to 2015. In 2015, the Agency recognized deferred pension inflows as a result of the implementation of GASB Statement No. 68 — *Accounting and Financial Reporting for Pensions — An Amendment of GASB Statement No. 27*. The amount recognized represents the Agency's contributions subsequent to the measurement date and the change in actuarial assumptions as described in Note 9 to the financial statements.

Net Position

Net position increased by \$1.22 million or 161.50% in 2016 compared to 2015 which increased by \$5.90 million or 114.68% in 2015 compared to 2014. Because the Agency is required by law to transfer its entire budgetary basis net position to the State of Maryland and its gaming revenue to government agencies, changes in net position do not reflect the results of the Agency's operating activities. Rather, changes in net position reflect differences between budgetary basis net income and net income in accordance with accounting principles generally accepted in the United States and the unclaimed prize fund.

The increase in net position in 2015 is primarily attributed to the gain on the sale of the VLTs. The Agency sold the majority of its VLTs when the gaming law changed that transferred ownership of the VLTs to two of the casinos. Net position increased in 2016 as a result of normal operating results.

Results of Operations

Table 2 is a summarized version of the statements of revenues, expenses, and changes in net position for the years ended June 30, 2016, 2015 and 2014.

	2016	2015	2014
Revenue			
Draw games	\$ 1,287,323	\$ 1,211,000	\$ 1,244,359
Instant games	611,286	546,054	479,632
ITLMs	6,934	3,812	—
Total sales	1,905,543	1,760,866	1,723,991
Gaming revenue — gross terminal revenue	741,694	681,823	579,134

MARYLAND LOTTERY AND GAMING CONTROL AGENCY MANAGEMENT'S DISCUSSION AND ANALYSIS

Sales

Net sales were \$1.91 billion in 2016, an increase of \$144.68 million or 8.22% as compared to 2015 which increased \$36.88 million or 2.14% as compared to 2014.

Lottery sales are categorized as draw games, instant ticket games or instant ticket lottery machine sales (ITLMs). Draw games are further categorized as Numbers, Monitor and Matrix games.

Draw games sales increased \$76.32 million or 6.30% in 2016 as compared to 2015 which decreased \$33.36 million or 2.68% compared to 2014. In 2014 through 2016, sales increased in both the numbers and monitor games. Matrix games rebounded in 2016 after decreasing between 2014 and 2015.

Table 3 — Net Sales of Draw Games (in thousands)

	<u>2016</u>	<u>2015</u>	<u>2014</u>
Numbers	\$ 522,353	\$ 517,869	\$ 515,364
Monitor	478,647	457,656	466,231
Matrix	286,323	235,475	262,764
Total	<u>\$1,287,323</u>	<u>\$1,211,000</u>	<u>\$1,244,359</u>

Sales for the Numbers games, which are Pick 3 and Pick 4, increased by \$4.48 million or .87% in 2016 compared to 2015 which increased \$2.50 million or .49% in 2015 compared to 2014. Pick 4 sales increased in years 2016 and 2015 over the previous years by \$3.83 million or 1.38% and \$6.13 million or 2.26% respectively, whereas Pick 3 sales increased in 2016 by \$659,000 or .27% over 2015 but decreased between 2015 and 2014 by \$3.63 million or 1.48%. The increase in Pick 4 sales and the relatively flat Pick 3 sales can be attributed to the top prize offered in these games. The top prize for Pick 3 is \$500, whereas the top prize for Pick 4 is \$5,000.

Sales for the Monitor games, which includes Keno and Racetrax® increased by \$20.99 million or 4.59% in 2016 compared to 2015, which decreased by \$8.58 million or 1.84% compared to 2014. Keno increased by \$8.57 million or 2.83% in 2016 compared to 2015 which decreased by \$5.12 million or 1.66% compared to 2014. It is believed that the decline in Keno from the impact of the casinos has subsided and our players have resumed playing Keno. Racetrax® sales increased by \$12.42 million or 8.03% in 2016 compared to 2015 which decreased by \$3.46 million or 2.19% in fiscal year 2015, compared to 2014. The increase in Racetrax® sales in 2016 is attributed to the HD graphics that were launched in June 2015. This game has proven that enhanced graphics increase sales. The decrease in Racetrax® sales between 2015 and 2014 was the result of the agency reducing the bet type for the Trifecta Box, whereby players could make the Trifecta Box purchase for \$0.50 versus \$1.00. As such, the average ticket price for the Trifecta Box fell from \$1.00 to \$0.86 resulting in a decline in overall sales.

Sales (continued)

Sales for Matrix games, which includes Powerball, Mega Millions, Bonus Match 5, Multi-Match, 5 Card Cash and Cash 4 Life increased by \$50.8 million or 21.59% in 2016 compared to 2015 which decreased by \$27.29 million or 10.39% compared to 2014.

Powerball was the leading sales contributor of all matrix games with sales increasing by \$54.02 million or 60.35% in 2016 compared to 2015 which decreased by \$16.25 million or 15.37% compared to 2014. In 2016, Powerball set a world record jackpot of \$1.6 billion. Sales in 2015 decreased from 2014 as the jackpots were hit at relatively low levels compared to 2014.

The increase in the overall matrix game category was also attributed to the launch of Cash4Life in January 2016. This game brought in \$11.96 million in sales. Cash4Life is a multi-jurisdictional game played in the states of Maryland, New York, New Jersey, Pennsylvania, Virginia and Tennessee.

All other matrix games decreased in 2016 from 2015. Mega Millions decreased by \$8.80 million or 10.73% in 2016 compared to 2015 which decreased by \$18.47 million or 18.38% compared to 2014. The decrease in Mega Millions is an industry wide issue as players suffer from jackpot fatigue. This game is not generating the large jackpots its once did and could not compete with the \$1.6 billion Powerball jackpot.

Bonus Match 5 decreased by \$709,000 or 3.32% in 2016 compared to 2015 which decreased by \$124,000 or .58% compared to 2014. Bonus Match 5 has a stable player base with very little change between years. 5 Card Cash decreased by \$620,000 or 9.49% in 2016 compared to 2015 which decreased \$1.80 million or 21.89% compared to 2014. Sales for this game have continued to decline as there is not a stable player base.

Multi-Match decreased by \$3.40 million or 9.87% in 2016 compared to 2015 which increased by \$7.80 million or 29.22% compared to 2014. The decrease in 2016 was the result of small jackpots and the game's inability to compete with Powerball. Sales increased in 2015 as the Multi-Match jackpot hit a high of \$3.6 million which was the fourth largest jackpot ever offered by the game.

Monopoly Millionaires' Club, a national game, was part of the matrix portfolio in 2015. The game was designed to create multiple millionaires in one draw. Jackpots started at \$15 million and could rise up to \$25 million. Once the main jackpot was won, approximately ten additional \$1 million winners would be selected. The game also offered a game show component. It quickly became apparent that the game was too confusing for players and sales were suspended in December 2014. Sales of this game in 2015 totaled \$1.6 million.

Sales (continued)

Instant ticket games are the second category of lottery games offered to the public. Instant ticket game sales increased by \$65.23 million or 11.95% in 2016 over 2015 which increased \$66.4 million or 13.85% compared to 2014 as shown in Table 4. 2016 was a record year for instant ticket sales. Instant ticket sales growth in 2016 was fueled by three key components: inventory management, an aggressive planning and development schedule and increased advertising. By closing older games and replenishing inventory with newer games, retailer and player interest and enthusiasm remained high throughout the fiscal year. Planning the right product mix and marketing, with games such as \$2 Crab Cash, \$5 Home Run Riches, \$5 The Price Is Right and \$20 Monopoly, also helped attract core and new players to our games. Lastly, an increased advertising budget along with a strategic approach to invest more money towards the Instant ticket product category was essential to the sales growth.

The increase in 2015 can be attributed to the success of licensed product games as well as the overall mix of the tickets. During 2015, nine licensed product games were launched (e.g., Monopoly, The Walking Dead) in comparison to three in 2014.

**Table 4 — Net Sales of Instant Games by Price Point
(in thousands)**

	<u>2016</u>	<u>2015</u>	<u>2014</u>
\$1	\$ 30,761	\$ 29,393	\$ 28,805
\$2	41,263	42,851	43,833
\$3	38,609	39,664	37,104
\$5	240,356	230,885	194,024
\$10	161,362	127,962	115,443
\$20	98,935	75,299	60,422
Total	<u>\$ 611,286</u>	<u>\$ 546,054</u>	<u>\$ 479,631</u>

Instant ticket lottery machines (ITLMs) are the third category of lottery games offered. Instant ticket lottery machines were first introduced in September 2014 and under law are allowed only in veterans' organizations in certain counties in Maryland. An ITLM is an electronic device that dispenses pre-printed instant scratch tickets and utilizes a touch screen monitor. The device accumulates winnings and prints out a voucher at the conclusion of play. ITLM sales (which are accounted for as amount bet less amount won) increased by \$3.12 million or 81.90% in 2016 as compared to 2015. The increase can be attributed to a further roll-out of the product and a gain in popularity.

Sales (continued)

The following graph depicts draw, instant and ITLM sales for 2016, 2015, and 2014.

Gaming Revenue — Gross Terminal Revenue, Table Games, State Grant, Facility Applicants, Machine Assessments and ITLM Lease Revenue

Gaming revenue – gross terminal revenue (GTR) represents the revenue generated by the VLTs net of total prize payouts. Gross terminal revenue in 2016 totaled \$741.69 million, an increase of \$59.87 million or 8.78% over 2015 which increased \$102.69 million or 17.73% over 2014. The increase in 2016 is primarily attributed to a full year of operations at Horseshoe Casino. Maryland Live! Casino, the Casino at Ocean Downs as well as Rocky Gap Casino Resort also saw increases in GTR during 2016. GTR at the Hollywood Casino Perryville decreased slightly in 2016 from 2015. The increase in 2015 is primarily attributed to the opening of the Horseshoe Casino in August 2014. In addition, GTR for the Casino at Ocean Downs and the Rocky Gap Casino Resort increased slightly. These increases were offset by decreases in GTR at Hollywood Casino Perryville and Maryland Live! Casino.

Table 5 — Gross Terminal Revenue Statistics

Casino	Date Opened	Number of Machines as of June 30, 2016	2016 GTR (in millions)	2015 GTR (in millions)	2014 GTR (in millions)
Hollywood Casino — Perryville	September 27, 2010	850	\$ 65.7	\$ 66.2	\$ 72.1
Casino at Ocean Downs	January 4, 2011	800	57.6	53.2	52.0
Maryland Live! Casino	June 6, 2012	3,923	408.8	392.5	419.6
Rocky Gap Casino Resort	May 22, 2013	634	41.3	38.1	35.4
Horseshoe Casino	August 24, 2014	2,202	168.3	131.8	—
Total		8,409	\$ 741.7	\$ 681.8	\$ 579.1

MARYLAND LOTTERY AND GAMING CONTROL AGENCY MANAGEMENT'S DISCUSSION AND ANALYSIS

Gaming Revenue — Gross Terminal Revenue, Table Game, State Grant, Facility Applicants, Machine Assessments and ITLM Lease Revenue (continued)

Gaming revenue – table games revenue generated in 2016 increased by \$45.88 million or 12.87% in 2016 compared to 2015 which increased by \$101.53 million or 39.84% compared to 2014. The following table shows table game statistics for the casinos.

Table 6 — Table Game Revenue Statistics

Casino	Date Tables Games Debuted	Number of Tables as of June 30, 2016	2016 Table Game Revenue (in millions)	2015 Table Game Revenue (in millions)	2014 Table Game Revenue (in millions)
Hollywood Casino — Perryville	March 6, 2013	22	\$ 11.6	\$ 12.0	\$ 13.6
Maryland Live! Casino	April 11, 2013	206	242.0	233.8	235.4
Rocky Gap Casino Resort	May 22, 2013	18	6.6	6.6	5.9
Casino at Ocean Downs	N/A	—	—	—	—
Horseshoe Casino	August 24, 2014	178	142.1	104.0	—
Total		424	\$ 402.3	\$ 356.4	\$ 254.9

For the gaming operations, the gross terminal revenue is required to be transferred to specified Government agencies to be used for certain purposes or is retained by the casinos and the Agency to assist in covering the costs of the operations. The table below shows the overall disbursements and allocations.

Table 7 — Gaming Revenue Disbursements/Allocations

Fund	2016 Disbursements (in millions)	2015 Disbursements (in millions)	2014 Disbursements (in millions)
Casino Operators	\$ 626.1	\$ 539.0	\$ 406.2
Maryland Education Trust Fund	402.5	387.8	328.4
Horse Racing	57.1	53.1	48.5
Local Impact Grants	39.7	36.5	30.9
Maryland Lottery and Gaming Control Agency	7.8	11.9	11.6
Small, Minority and Women-Owned Business	10.8	9.9	8.4
Total	\$ 1,144.0	\$ 1,038.2	\$ 834.0

Gaming Revenue — Gross Terminal Revenue, Table Game, State Grant, Facility Applicants, Machine Assessments and ITLM Lease Revenue (continued)

Gaming revenue – state grant represents funds received from the State of Maryland to help pay for the costs of the gaming operations. Gaming revenue – state grant decreased by \$45.99 million or 69.40% in 2016 which decreased by \$15.39 million or 18.84% compared to 2014. The decreases in both 2016 and 2015 are the result of a change in the gaming law that specified, effective April 1, 2015, the Agency would no longer own/lease VLTs at Hollywood Casino Perryville and Maryland Live! Casino. As a result, less funding was needed to pay for the VLTs.

Gaming revenue – facility applicants represents money received to perform background investigations on applicants who have applied for a gaming license. Gaming revenue – facility applicants decreased by \$892,000 or 31.70% in 2016 compared to 2015 which decreased by \$469,000 or 14.3% compared to 2014. This account fluctuates based on the number of license applications received. The decreases in 2016 and 2015 are attributed to no major casino openings.

Gaming revenue – machine assessments represents assessments made to casino operators based on the maximum number of VLTs on the floor during the fiscal year and the number of table games on the floor as of the end of the fiscal year. In accordance with the law, casino operators are assessed a yearly fee of \$425 per VLT and \$500 per table. These funds are collected by the Agency and subsequently remitted to the Department of Health and Mental Hygiene's Problem Gambling Fund. Machine assessments decreased by \$123,000 or 3.11% in 2016 compared to 2015 which increased by \$932,000 or 30.71% compared to 2014. The decrease in 2016 is attributed to a lower number of VLTs on the floor in 2016 as compared to 2015. The increase in 2015 is due to the opening of the Horseshoe Casino and the related assessment.

Gaming revenue – ITLM lease revenue increased \$1.31 million or 82.27% in 2016 compared to 2015. ITLM lease revenue represents the amount collected from the veterans' organizations that is used to pay the machine fees to the ITLM vendor. The ITLM program began operations in 2015.

Cost of Sales

Cost of sales consists of lottery prize expense, lottery retailer commissions, casino operator commissions, costs paid to vendors to operate and maintain the lottery system and the gaming system, and costs paid for the printing and delivery of instant games. Cost of sales increased by \$185.53 million or 10.61% in 2016 compared to 2015 which increased by \$169.69 million or 10.75% compared to 2014.

Commission paid to casino operators increased by \$87.10 million or 16.16% in 2016 compared to 2015 which increased by \$132.8 million or 32.68% compared to 2014. The increase in commissions in 2016 was the result of overall higher slot machine and table game revenue and it was also the first full year of operation for Horseshoe Casino. The increase in 2015 is primarily attributed to the opening of Horseshoe Casino in August 2014.

Cost of Sales (continued)

Commissions paid to lottery retailers increased by \$12.56 million or 9.77% in 2016 compared to 2015 which increased by \$6.49 million or 5.31% compared to 2014. Typically, increases and decreases in commission are a function of sales as retailers receive a percentage of all tickets sold and cashed at their location. Sales in both 2016 and 2015 increased resulting in an increase in commission paid to retailers.

Prize expense increased by \$81.82 million or 7.78% in 2016 compared to 2015 which increased \$29.45 million or 2.88% compared to 2014. There is a direct correlation between prize expense and sales. As such, the increase in both 2016 and 2015 was the result of an increase in sales.

Operating Expenses

Operating expenses decreased by \$31.11 million or 32.61% in 2016 compared to 2015 which decreased by \$24.09 million or 20.16% compared to 2014.

Other general and administrative expenses decreased by \$44.72 million or 89.43% in 2016 compared to 2015 which decreased by \$24.38 million or 32.77% compared to 2014. The decrease in both years is attributed to the transfer of ownership of the VLTs in March 2015 to two of the casinos and the renegotiation of rates paid for the VLTs. In 2015, a full nine months' worth of VLT funding was needed for four casinos whereas in 2016 funding was only needed for the two smallest casinos. In addition, the two final bond payments were made on the VLTs in 2015. The decrease in 2015 from 2014 is the result of only 9 months of funding needed to pay for these VLTs in 2015 compared to 12 months in 2014.

Depreciation and amortization increased by \$3.2 million or 32.68% in 2016 compared to 2015 which decreased by \$3.47 million or 26.11% compared to 2014. The increase in 2016 is attributed to a full year's worth of amortization of the VLTs compared to three months in 2015. The decrease in 2015 is the result of the transfer of ownership of VLTs that occurred in March 2015. As such, only 9 months of depreciation expense was recognized for a significant number of the VLTs.

Non-operating Revenue (Expenses)

Non-operating expenses increased by \$60.68 million or 5.93% in 2016 compared to 2015 which increased by \$79.46 million or 8.4% compared to 2014. Non-operating expenses primarily consist of unrealized losses on investments held to fund obligations to annuitants and payments to the State of Maryland General Fund, the Stadium Authority, the Veterans Trust Fund and other government agencies. The Agency expects to realize the face value of its investments, since it intends to hold these investments until maturity. Therefore, any interim unrealized gains or losses on investments will reverse. The change in fair value of the investments held by the Agency is discussed in more detail on page 60.

The increase in 2016 is attributed to increases in payments made to the State of Maryland General Fund, the Stadium Authority, the Veterans Trust Fund and other governmental agencies due to higher lottery profits and casino revenue. Transfers made to the Stadium Authority increased by \$20 million or 100% in 2016 from 2015 as the law required the Agency to transfer an additional \$20 million for Baltimore City school construction.

Non-operating Revenue (Expenses) (continued)

In 2015, the Agency had non-operating revenue of \$4.22 million. This revenue was primarily attributed to the gain on the sale of VLTs that occurred as a result of the gaming law change that took effect on April 1, 2015 and transferred the ownership of the VLTs at two of the casinos. As a result, the Agency sold the majority of its state owned VLTs.

The Agency is required by State law to transfer its budgetary basis net income to the State of Maryland (General Fund, Stadium Authority and the Veterans Trust Fund) from its lottery operations. Furthermore, it is required to transfer revenue from its gaming operations to various government agencies. Accordingly, the Agency's success can be measured by the income it transfers.

Transfers to the State of Maryland from lottery operations totaled \$569.81 million, an increase of \$43.29 million or 8.22% over 2015 which increased \$5.42 million or 1.04% compared to 2014. The increase in both 2016 and 2015 is the result of an increase in lottery sales and profits. The graph below depicts the payments made to the State of Maryland for 2016, 2015, and 2014.

Table 8 — Payments to the State of Maryland

Transfers to other government funds/agencies increased by \$14.48 million or 2.90% in 2016 compared to 2015 which increased by \$79.05 million or 18.79% compared to 2014. Table 7 on page 43 provides a breakdown of the various accounts. The increase in 2016 is the result of overall higher lottery profits and casino revenues. The increase in 2015 is the result of the opening of Horseshoe Casino and overall higher VLT and table game revenue. In addition, it is a result of higher gaming net income which was attributed to the sales of the VLTs.

Contacting the Agency's Financial Management

The financial report is designed to provide a general overview of the Agency's financial activity for those interested in the Agency's operations. Questions concerning any of the information provided in this report or requests for additional financial information should be addressed to: Gina M. Smith, Deputy Director/CFO, Maryland Lottery and Gaming Control Agency, 1800 Washington Boulevard, Suite 330, Baltimore, Maryland 21230.

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

LEGISLATIVE ENACTMENT

The Maryland Lottery and Gaming Control Agency (Agency) was established by the Maryland General Assembly enactment of Chapter 365 of Laws of Maryland of 1972, and the voters' approval that same year of a constitutional amendment to allow the lottery. The amendment was ratified on November 7, 1972, and the Agency commenced operations on January 2, 1973.

The mandate of the law was to establish a State-operated lottery, under the immediate supervision of a Director and the guidance of a Commission, for the purpose of producing revenue for the State. The Governor, with the advice and consent of the Senate of Maryland, appoints the Director and the Commission members.

During the 2007 special session of the Maryland General Assembly, Chapter 4 was enacted relating to the legalization of video lottery terminals (VLTs) in the State subject to the passage of a voters' constitutional referendum. In 2008, voters approved the installation of up to 15,000 VLTs at five privately owned casinos at specified locations throughout the State.

On August 14, 2012, Senate Bill 1 – Gaming Expansion – Video Lottery Terminals and Table Games passed the 2012 Second Special Session of the Maryland General Assembly. This bill contained many provisions concerning gaming operations and certain provisions that were subject to voter referendum. The provisions which were subject to voter referendum passed during the November 6, 2012 election and allowed for a sixth casino at a site in Prince George's County, increased the maximum number of video lottery terminals allowed in the State from 15,000 to 16,500, established table games and allowed for 24-7 operations.

Effective October 1, 2012, the bill also authorized the Agency to issue certain veterans' organizations a license for up to five instant ticket lottery machines (ITLMs). Veterans' organizations in counties on the Eastern Shore and in Montgomery County are not eligible. After deductions for commissions and prize payouts, 10% of the proceeds are distributed to the Maryland Veterans Trust Fund and the remainder goes to the General Fund. An ITLM is an electronic device that dispenses pre-printed instant scratch tickets and utilizes a touchscreen monitor. The device scans and validates the barcode on the instant ticket as it is dispensed and displays the result of the ticket on the touchscreen monitor. The device accumulates winnings for the player and prints out a voucher at the conclusion of play that can be redeemed for cash or inserted into another ITLM for continued play.

The Agency, in conjunction with its Commission, serves as the regulator of the Gaming program and is responsible for regulating the casinos, licensing the casino operators and all other entities and individuals requiring a gaming license and the collection and disbursement of VLT gross terminal revenue and table game revenue in accordance with the law.

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

The Agency is a part of the primary government of the State of Maryland and is reported as a proprietary fund and business-type activity within the State of Maryland's financial statements. The State of Maryland prepares a comprehensive annual financial report (CAFR). The Agency is an enterprise fund of the State of Maryland and is included in the basic financial statements of the CAFR of the State of Maryland.

BASIS OF ACCOUNTING AND PRESENTATION

The Agency is accounted for as a proprietary special purpose government fund engaged in business-type activities. In accordance with Governmental Accounting Standards Board (GASB) Statement No. 34, *Basic Financial Statements and Management's Discussion and Analysis for State and Local Governments*, and with accounting principles generally accepted in the United States of America, the financial statements are prepared on the accrual basis of accounting which requires recognition of revenue when earned and expenses when incurred. As permitted by GASB No. 20, *Accounting and Financial Reporting for Proprietary Funds and Other Governmental Units That Use Proprietary Fund Accounting*, the Agency has elected to not adopt Financial Accounting Standard Board (FASB) statements and interpretations issued after November 30, 1989, unless the GASB specifically adopts such FASB statements or interpretations.

USE OF ESTIMATES

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts in the financial statements and accompanying notes. Actual results may differ from those estimates.

LOTTERY GAMES – REVENUE RECOGNITION AND PRIZE OBLIGATIONS

Revenue from lottery games originates from three product lines: draw games, instant games and instant ticket lottery machines (ITLMs). The Agency develops multiple game themes and prize structures to comply with its enabling legislation and customer demand. Independent and corporate retailers comprised principally of grocery and convenience stores, package goods stores, and restaurants serve as the primary distribution channel for draw and instant lottery sales. Veterans' organizations are the only distribution channel for ITLMs. Retailers receive a sales commission of 5.5% of net sales and a cashing commission of 3% of prizes redeemed. Veterans' organizations earn an additional ½% sales commission on ITLM sales.

Licensed lottery retailers sell draw game lottery tickets to the public through the use of computerized terminals. Draw games are categorized as: Numbers (Pick 3 and Pick 4), Matrix (Multi-Match, Mega Millions/Megaplier, Powerball/Powerplay, Bonus Match 5, 5 Card Cash and Monopoly Millionaires Club) and Monitors (Keno, Keno Bonus®, Keno Super Bonus, Racetrax®, and Racetrax® Bonus). Draw revenue is recognized in the month in which the related drawings are held. Revenue from the

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

sale of tickets and commissions paid for future drawings are deferred until the drawings are held. Revenue from instant games is recognized when the retailer activates the book of tickets. Licensed veterans' organizations offer ITLMs to their customers. The Agency recognizes ITLM revenue as "gross terminal revenue" equivalent to all wagers, net of related prizes.

Prize obligations for draw games are determined and recognized after each drawing is held. For all draw games, winners are paid a certain amount depending upon the number of winners and the order of the winning numbers drawn. The Multi-Match, Mega Millions and Powerball jackpots are calculated as a percentage of total game revenue. If there is no jackpot winner, the prize pool is carried forward until there is a winner. The remaining Multi-Match, Mega Millions and Powerball prize levels are based on a predetermined set amount. Prize obligations are recognized monthly for instant games based on the books activated by retailers and the related prize expense based on the specific game's prize structure. Prize expense for ITLM is recorded as amounts are won and is used in determining the "gross terminal revenue" for ITLM.

GAMING OPERATIONS (VLTs AND TABLE GAMES) — REVENUE RECOGNITION AND PRIZE OBLIGATIONS

As of the end of fiscal year 2016, five casinos were in operation with a total of 8,409 VLTs. VLTs are a self-activated video version of lottery games which allow for a player to place bets for the chance to be awarded credits which can either be redeemed for cash or be replayed as additional bets. The prize structures of these video lottery games are designed to award prizes, or credits, at a stipulated rate of total bets played, and prize expenses are netted against total video credits played. The Agency recognizes VLT revenue as "gross terminal revenue" equivalent to all wagers, net of related prizes.

In accordance with the law, the casino operators receive a specified percentage of gross terminal revenue to operate their casinos. Prior to April 1, 2015, two of the casino operators received 33% of the gross terminal revenue, one casino operator received 39% of the gross terminal revenue, one casino operator received 43% of the gross terminal revenue and one casino operator received 50% of the gross terminal revenue. Effective April 1, 2015, there was a law change that required two of the casinos to own/lease their own VLTs instead of the Agency. In exchange, the percentage of gross terminal revenue received by these casinos increased from 33% to 39% for one casino and from 33% to 41% for the other casino. Also, prior to April 1, 2015, the Agency retained 2% of the gross terminal revenue to help fund the operations of the VLT program. Since, effective April 1, 2015, the Agency no longer owned/leased the VLTs at two of the casinos, the Agency now retains 1% of the gross terminal revenue from all of the casinos with the exception of one casino where the Agency still retains 2% of the gross terminal revenue. The enabling legislation requires the Agency to disburse the remainder of the gross terminal revenue to other Government agencies, which in turn are responsible for making further distributions.

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

As of June 30, 2016, there were 424 table games in operation at four of the casinos. Table games include blackjack, roulette, craps, baccarat, big six wheel and various poker games. Table game revenue is equivalent to all wagers, net of related prizes. Casino operators receive 80% of the table game revenue to operate their casino. The remaining 20% is remitted to the Agency who in turn transfers it to the Education Trust Fund in accordance with the enabling legislation. The casino operators' share of the revenue from both VLTs and table games is recorded as a cost of sales.

To further help fund the operations of the Gaming program, the State provided grants to the Agency during fiscal years 2016 and 2015 in the amount of \$20,274,795 and \$66,263,057 respectively.

License related revenues (application, license, fingerprint, principal applicant background investigation, and vendor fees) are recorded as licensing deposits until the receipt is identified as being for a specific applicant and type of fee which usually occurs in the same month that the deposit is received. After the specific applicant and fee type is ascertained, the related deposit amount is recognized as revenue, except for principal applicant investigation fees which are recognized as revenue when the background investigation is completed and the applicant is either invoiced for any investigation costs in excess of the deposit received or the portion of the deposit in excess of investigation costs is returned to the applicant.

Administrative expenses for the Gaming program are recognized as they are incurred. The majority of the expenses incurred for the VLT program are for the lease of the VLTs. Prior to April 1, 2015, the Agency was required to purchase or lease the VLTs for four of the five casinos. Effective, April 1, 2015, the Agency was only required to purchase or lease VLTs at two of the five casinos. VLTs that were purchased by the Agency were financed through the State Treasurer's Office and were treated as a capital lease for financial statement purposes. The Agency made its final payment on these VLTs in March 2015. At the same time, the Agency sold the VLTs that it had originally purchased. The gain on the sale of these VLTs is recognized as non-operating revenue in the accompanying statements of revenue, expenses and changes in net position in 2015.

Prior to April 1, 2015, the leased VLTs were comprised of VLTs that had no minimum lease period or VLTs that had a minimum lease period of 12 or 18 months. For the VLTs that did not have a minimum lease period, the Agency treated these payments as an administrative expense and recognized the expense when incurred. For the VLTs that had a minimum lease period, the majority of them met the criteria for capital leases and were treated as such for financial statement purposes. The lease terms for these VLTs had expired by December 2013. For the remaining VLTs that did not meet the criteria for capital leases, the Agency treated these payments as an administrative expense and recognized the expense when incurred. Effective April 1, 2015, the Agency entered into new contracts with several manufacturers to lease the VLTs at two casinos. All of these leases met the criteria for capital leases and are treated as such for financial statement purposes.

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

OPERATING AND NON-OPERATING REVENUES AND EXPENSES

Operating revenues and expenses for proprietary funds such as the Agency are revenues and expenses that result from providing services and producing and delivering goods and/or services. Operating revenues for the Agency are derived from providing various types of lottery games, various VLT games and table games. Operating expenses for lottery games include the costs to operate the various games, to pay prize winners, and administrative expenses. Operating expenses for gaming include the costs to operate the various games and administrative expenses. All revenues and expenses not meeting this definition are reported as non-operating revenues and expenses.

CASH AND CASH EQUIVALENTS

Cash and cash equivalents include cash deposited with financial institutions, deposits with the Maryland State Treasury and overnight investment repurchase agreements.

CASH AND CASH EQUIVALENTS – RESTRICTED – GAMING LICENSE DEPOSITS

Cash and cash equivalents – restricted – gaming license deposits account is used to record the receipt of license related fees and investigation deposits that are received from applicants wanting to obtain a gaming license. For the majority of applicants, fees are recorded as revenue after the specific applicant and type of fee received is determined. At the end of each month, these fees are transferred to the Gaming Special Fund account.

For principal employee applicants, in addition to the aforementioned fees, the Agency also receives a background investigation deposit which is used to pay the investigation costs for the principal employee applicant. These deposit amounts remain in cash and cash equivalents – restricted – gaming license deposits and are recorded as a licensing deposit liability until the investigation is completed. To the extent that the investigation deposit is greater than the costs incurred for the investigation, the monies are refunded to the applicant. To the extent that the investigation deposit is less than the costs incurred for the investigation, the applicant is billed for the deficit. After the investigation is completed, the deposit is recorded as revenue and is transferred to the Gaming Special Fund account.

CASH AND CASH EQUIVALENTS – AGENT

Cash and cash equivalents – agent consists of lottery agency funds deposited in escrow with a financial institution and the related interest earned. Monies deposited into the escrow accounts were received from select retailers who deposited monies with the Agency in lieu of obtaining a bond.

ACCOUNTS RECEIVABLE – LOTTERY

Accounts receivable – lottery represents the amounts due from lottery retailers from the sale of lottery tickets. The Agency utilizes the allowance method to provide for doubtful accounts based on management's evaluation of the collectability of accounts receivable. The Agency determines accounts receivable to be delinquent when greater than 10 days past due. Receivables are written off

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

when it is determined that amounts are uncollectible. As of June 30, 2016 and 2015, management believes all accounts receivable are collectible, and, as such, no allowance for doubtful accounts has been recorded.

ACCOUNTS RECEIVABLE – GAMING

Accounts receivable – gaming represents outstanding amounts due that have been billed to applicants for completed background investigations and amounts due from VLT manufacturers for liquidated damages.

ACCOUNTS RECEIVABLE – CASINO OPERATORS

Accounts receivable – casino operators represents the amount of gross terminal revenue and table games revenue due from the casino operators. Gross terminal revenue is collected on a daily basis. Table game revenue is collected every two days. Also included in the June 2016 and 2015 balances are the amount due from the casino operators for the \$425 per VLT assessment and the \$500 per table game assessment that is due to the Problem Gambling Fund. Management believes that all accounts receivable are collectible, and as such, no allowance for doubtful accounts has been recorded as of June 30, 2016 and 2015.

CAPITAL ASSETS AND LEASEHOLD IMPROVEMENTS

The Agency has adopted a policy of capitalizing assets with individual amounts exceeding \$25,000 and all leased assets. These assets are comprised principally of VLTs. The purchased assets are recorded at cost and depreciation is computed using the straight-line method over three-to-five year useful lives. Assets acquired through capital leases are initially recorded at the net present value of the minimum lease payments. Assets acquired under capital leases are amortized over the lesser of the lease term or the estimated useful life of the leased asset.

INVESTMENTS

Investments consist of United States Government Treasury Bonds and annuity contracts. The investments in United States Government Treasury Bonds are purchased in the name of the Agency and stated at fair value based on quoted market prices. Investments in annuity contracts are purchased in the name of the Agency and stated at present value, which approximates fair value.

COMPENSATED ABSENCES

The Agency accrues compensated absences in accordance with GASB No. 16, *Accounting for Compensated Absences*. All full-time permanent Agency employees accrue annual leave at variable rates based on the number of years employed by the State of Maryland. The maximum annual leave an employee can earn per calendar year is 25 days. At the end of each calendar year, an employee's accrued annual leave may not exceed 75 days. Accrued annual leave is included in the employee related payables in the accompanying statements of net position. Agency employees also accrue

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

sick pay benefits. However, the Agency does not record a liability for accrued sick pay benefits as neither the State of Maryland nor the Agency has a policy to pay unused sick leave when employees terminate from State service.

PAYMENTS TO THE STATE OF MARYLAND

The law requires the Agency to transfer its lottery revenue in excess of funds allocated to prize awards and operating expenses to the State of Maryland General Fund and to a lesser extent the Maryland Stadium Authority and the Veteran's Trust Fund. These payments are recorded as a non-operating expense in the accompanying statements of revenues, expenses, and changes in net position.

The law further requires the Agency to transfer its gaming revenue to various governmental agencies. On a monthly basis, in accordance with percentages specified in the law, the Agency transfers funds to the State's Department of Education into the Maryland Education Trust Fund; the State's Racing Commission into accounts for Local Impact Grants, Purse Dedication and Racetracks Facility Renewal and to the State's Board of Public Works into the Small, Minority, and Women-Owned Business Account. These transfers are recorded as non-operating expenses in the accompanying statements of revenues, expenses and changes in net position.

A summary of the total game revenue and the distributions for the years ended June 30, 2016 and 2015, respectively, follows:

Fund	Fiscal Year 2016	Fiscal Year 2015
Education Trust Fund	\$ 402,504,945	\$ 387,775,612
Local Impact Grants	39,656,342	36,453,259
Horse Purse Dedication	50,058,359	46,014,332
Racetracks Facility Renewal	7,003,586	7,104,779
Small, Minority and Women Owned Businesses	10,815,365	9,941,798
Maryland Lottery and Gaming Control Agency	7,832,058	11,934,165
Casino Operators	626,102,299	538,999,870
Total	\$ 1,143,972,954	\$ 1,038,223,815

NET POSITION

Net position is presented as either unrestricted or invested in capital assets, net of related debt. Net position invested in capital assets, net of related debt, represents the difference between capital assets net of accumulated depreciation and the related capital lease obligations. Unrestricted net position represents the net position available for future operations including outstanding encumbrances as of year-end and unrealized gains or losses on investments. Market gains or losses represent temporary fluctuations and are not recognized in the calculation of the amount due to the Maryland Stadium Authority, State of Maryland General Fund or payments to Other Governmental Agencies.

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

NEW ACCOUNTING PRONOUNCEMENTS

The Agency implemented GASB Statement No 72 (GASB No. 72), *Fair Value Measurement and Application* for the fiscal year ended June 30, 2016. The Agency's investments are reported at fair value and are classified and disclosed in accordance with this Statement as disclosed in Note 3.

GASB has issued Statement No 73 (GASB No. 73) *Accounting and Financial Reporting for Pensions and Related Assets That Are Not within the Scope of GASB Statement 68*, and *Amendments to Certain Provisions of GASB Statements 67 and 68*, GASB Statement No 76 (GASB No. 76), *The Hierarchy of Generally Accepted Accounting Principles for State and Local Governments*, GASB Statement No 77 (GASB No. 77), *Tax Abatement Disclosures*, GASB Statement No 78 (GASB No. 78), *Pensions Provided through Certain Multiple-Employer Defined Benefit Pension Plans* and GASB Statement No. 79 (GASB No. 79), *Certain External Investment Pools and Pool Participants* effective for periods beginning after June 15, 2015. These Statements have no effect on the Agency.

GASB has also issued Statement No 74 (GASB No. 74), *Financial Reporting for Postemployment Benefit Plans Other Than Pension Plans*, GASB Statement No 80 (GASB No. 80), *Blending Requirements for Certain Component Units – an amendment of GASB Statement No. 14* and GASB Statement No 81 (GASB No. 81), *Irrevocable Split-Interest Agreements* effective for fiscal years beginning after June 15, 2016 and Statement No. 75 (GASB No. 75), *Accounting and Financial Reporting for Postemployment Benefits Other Than Pensions* effective for fiscal years beginning after June 15, 2017. The Agency is in the process of assessing the impact of these statements and will implement them as of the effective dates.

2. CASH AND CASH EQUIVALENTS

As of June 30, 2016 and June 30, 2015, the carrying amounts of deposits with financial institutions were \$3,469,023 and \$6,296,533, respectively. The corresponding bank balances were \$3,153,215 and \$5,095,666 as of June 30, 2016 and June 30, 2015, respectively.

As of June 30, 2016 and June 30, 2015, the amount on deposit with the Maryland State Treasury (State Treasury) was \$156,369,397 and \$190,303,942, respectively. The corresponding State Treasury balances were \$21,792,628 and \$19,420,302, respectively. The State Treasury has statutory responsibility for the daily cash management activities of the State's agencies, departments, boards, and commissions. The deposits with the State Treasury are part of the State of Maryland's internal investment pool and are not separately identifiable as to specific types of securities. The State Treasury maintains these and other Maryland State agency funds on a pooled basis in accordance with State statute. The Agency does not obtain interest on funds deposited with the State Treasury. As of June 30, 2016 and 2015, the Agency's deposits with the State Treasury were 2.2% and less than 2.0%, respectively, of the total deposits with the State Treasury.

Custodial credit risk – Custodial credit risk is the risk that in the event of a bank failure, the Agency's deposits will not be returned to it. The Agency's deposit policy requires that it comply with the

2. CASH AND CASH EQUIVALENTS (CONTINUED)

State law that governs the State Treasury deposits. Specifically, unexpended or surplus money may be deposited in a financial institution in the State, if the deposit is interest bearing; the financial institution provides collateral that has a market value that exceeds the amount by which a deposit exceeds the deposit insurance; and the custodian holds the collateral.

Interest rate risk – The State Treasury investment policy states that to the extent possible, it will attempt to match its investments with anticipated cash flow requirements. Unless matched to a specific cash flow, the State Treasury will not directly invest in securities maturing more than five years from the date of purchase.

Credit risk – State law requires that the State Treasury investments in repurchase agreements be collateralized by United States Treasury and Agency Obligations. In addition, investments may be made directly in United States Agency Obligations. State law also requires that money market mutual funds receive the highest possible rating from at least one nationally recognized statistical rating organization.

Concentration of credit risk – The State Treasury's investment policy limits the amount of repurchase agreements to be invested with a particular institution to 30% of the portfolio. There is no other limit on the amount that may be invested in any one issuer. More than 5% of government fund investments are in the FNMA and the Federal Home Loan Mortgage Corporation. As of June 30, 2016, these investments are 23.63% and 40.35% of the State of Maryland's internal investment pool total investments, respectively. As of June 30, 2015, these investments were 33.55% and 44.57% of the State of Maryland's internal investment pool total investments, respectively.

3. INVESTMENTS

UNITED STATES GOVERNMENT TREASURY BONDS

It is the Agency's policy to fund jackpot and lifetime prize awards through the purchase of United States Government Treasury Bonds. Furthermore, it is the policy of the Agency to hold these investments to maturity. The investment maturities approximate the annuity prizes payable installment due dates.

The Agency has purchased long-term investments to fund jackpot and lifetime prize awards. The majority of these investments are United States Government Treasury Bonds, which carry a yield to maturity of approximately 0.347% to 6.942%. As of June 30, 2016 and June 30, 2015, the Agency's United States Government Treasury Bonds totaled \$34,889,597 and \$37,163,966, respectively. The investments in United States Government Treasury Bonds are carried at fair value based on quoted market prices on the accompanying statements of net position and the related unrealized gains (losses) and interest income are recorded as investment revenue (loss) on the accompanying statements of revenues, expenses, and changes in net position.

Through the State securities lending program, authorized under section 2-603 of the State's Finance and Procurement Article of the Annotated Code of Maryland, the State Treasurer's Office lends

3. INVESTMENTS (CONTINUED)

United States Government securities to broker-dealers and other entities (borrowers). As of June 30, 2016 and June 30, 2015, Agency United States Government Treasury Bonds totaling \$13,121,921 and \$18,846,718, respectively, were lent as part of this program. The State Treasurer's Office controls the program and authorizes all transactions. The State's (and Agency's) custodial bank manages the securities lending program by contracting with a lending agent who receives cash as collateral. The lending agent may use or invest cash collateral in accordance with the reinvestment guidelines approved by the State Treasurer's Office. Additionally, under the terms of the lending agreement, the lending agent indemnifies the State against any credit loss arising from investment of the collateral. The collateral will be returned for the same securities by the next business day if the aggregate value of the collateral falls to less than 100% of the market value of the securities lent against the collateral. Cash collateral is initially pledged at greater than the market value of the securities.

At year-end, the State has no credit risk exposure to borrowers because the amounts the State owes the borrowers exceed the amounts the borrowers owe the State. As of June 30, 2016 and 2015, the related collateral for the Agency securities lent totaled \$13,357,610 and \$19,183,372, respectively, resulting in 101.8% as of June 30, 2016 and 2015, collateralization of the fair value of the Agency securities lent. The benefit of collateral received or income earned is not passed onto the Agency and therefore not reflected in the Agency's financial statements.

Either the State or the borrower may terminate the lending agreements on demand. Lending agreements are usually short in duration. The duration of the lending agreements is matched with the term to maturity of the investment of the cash collateral by investing only in repurchase agreements. Such matching existed at year-end. The State's custodial bank is obligated to indemnify the State against liability for any suits, actions, or claim of any character arising from or relating to the performance of the bank under the contract, except for liability caused by acts or omissions of the State. The State did not experience any losses on their securities lending transactions for the years ended June 30, 2016 and 2015.

ANNUITY CONTRACTS

As of June 30, 2016 and June 30, 2015, the annuity contracts totaled \$117,000 and \$139,615, respectively. The annuity contracts were purchased in 1976 to satisfy the Agency's obligation for certain lifetime prizes. The value of the annuity contracts and related annuity prizes payable were adjusted in fiscal year 2005 based on revised actuarial life expectancy tables.

INVESTMENT RISK

Interest rate risk is the risk that an investment's fair value decreases as market interest rates increase. Typically, this risk is higher in debt securities with longer maturities. The Agency is not subject to interest rate risk because it is the Agency's policy to hold the investments until maturity, unless an annuitant through a court order forces the sale of an investment to settle the Agency's obligation to the annuitant at which time the annuitant would be paid the proceeds received from the sale of the investments.

3. INVESTMENTS (CONTINUED)

For an investment, custodial risk is the risk that in the event of the failure of the counterparty, the Agency will not be able to recover the value of its investments or collateral securities that are in the possession of an outside party. The Agency is not subject to custodial risk because the United States Government Treasury Bonds are held in the Agency's name by its custodian and annuity contracts are not evidenced by securities that exist in physical or book entry form.

UNITED STATES GOVERNMENT TREASURY BONDS AND ANNUITY CONTRACTS

As of June 30, 2016, the Agency had the following investments:

Investment Type	Fair Value	Credit Quality Rating	% of Investments	Investment Maturities (In Years)				
				Less than 1	1–5	6–10	11–20	21–30
<u>Investments in prize annuities:</u>								
United States								
Treasury Bonds	\$34,889,597	1	99.7%	\$4,681,839	\$13,709,286	\$12,163,910	\$4,018,215	\$316,347
Annuity Contracts	117,000	2	.3%	25,464	62,795	18,857	9,884	-
Total Investments	<u>\$35,006,597</u>		<u>100.0%</u>	<u>\$4,707,303</u>	<u>\$13,772,081</u>	<u>\$12,182,767</u>	<u>\$4,028,099</u>	<u>\$316,347</u>

1 Credit quality ratings not required for U.S. government and agency securities that are explicitly guaranteed by the U.S. government.

2 Annuity contracts not rated.

As of June 30, 2015, the Agency had the following investments:

Investment Type	Fair Value	Credit Quality Rating	% of Investments	Investment Maturities (In Years)				
				Less than 1	1–5	6–10	11–20	21–30
Investments in prize annuities:								
United States Treasury Bonds	\$37,163,966	1	99.6%	\$7,357,958	\$14,458,821	\$11,354,683	\$3,992,504	\$–
Annuity Contracts	139,615	2	.4%	28,066	81,037	18,681	11,831	–
Total Investments	<u>\$37,303,581</u>		<u>100.0%</u>	<u>\$7,386,024</u>	<u>\$14,539,858</u>	<u>\$11,373,364</u>	<u>\$4,004,335</u>	<u>\$–</u>

1 Credit quality ratings not required for U.S. government and agency securities that are explicitly guaranteed by the U.S. government.

2 Annuity contracts not rated.

3. INVESTMENTS (CONTINUED)

Investments are measured and reported at fair value and are classified and disclosed in one of the following categories:

Level I – Quoted prices are available in active markets for identical investments as of the reporting date.

Level II – Pricing inputs are other than quoted prices in active markets, which are either directly or indirectly observable as of the reporting date, and fair value is determined through the use of models or other valuation methodologies.

Level III – Pricing inputs are unobservable for the investment and include situations where there is little, if any, market activity for the investment. The inputs into the determination of fair value require significant management judgment or estimation.

The following table sets forth by level, within the fair value hierarchy, the Agency's investments at fair value as of June 30, 2016:

	Level 1	Level 2	Level 3	Total
<u>Investments by fair value level</u>				
U.S. Treasury Obligations	\$ 34,889,597	\$ –	\$ –	\$ 34,889,597
Annuities	–	117,000	–	117,000

The following table sets forth by level, within the fair value hierarchy, Agency's investments at fair value as of June 30, 2015:

	Level 1	Level 2	Level 3	Total
<u>Investments by fair value level</u>				
U.S. Treasury Obligations	\$ 37,163,966	\$ –	\$ –	\$ 37,163,966
Annuities	–	139,615	–	139,615

4. CAPITAL ASSETS

A summary of capital asset activity for the years ended June 30, 2016 is as follows:

	2015	Increases	Decreases	2016
Capital Assets				
Machinery and Equipment	\$94,438,354	\$ –	\$ –	\$94,438,354
Leasehold Improvements	613,240	–	–	613,240
Total Capital Assets	95,051,594	–	–	95,051,594
Less Accumulated Depreciation and Amortization				
Machinery and Equipment	32,682,266	13,038,756	–	45,721,022
Leasehold Improvements	613,240	–	–	613,240
Total Accumulated Depreciation and Amortization	33,295,506	13,038,756	–	46,334,262
Net Capital Assets	<u>\$ 61,756,088</u>	<u>\$ 13,038,756</u>	<u>\$ –</u>	<u>\$ 48,717,332</u>

A summary of capital asset activity for the years ended June 30, 2015 is as follows:

	2014	Increases	Decreases	2015
Capital Assets				
Machinery and Equipment	\$ 70,126,934	\$ 64,910,068	\$ 40,598,648	\$94,438,354
Leasehold Improvements	613,240	-	-	613,240
Total Capital Assets	70,740,174	64,910,068	40,598,648	95,051,594
Less Accumulated Depreciation and Amortization				
Machinery and Equipment	59,601,372	9,827,449	36,746,555	32,682,266
Leasehold Improvements	613,240	-	-	613,240
Total Accumulated Depreciation and Amortization	60,214,612	9,827,449	36,746,555	33,295,506
Net Capital Assets	<u>\$ 10,525,562</u>	<u>\$ 55,082,619</u>	<u>\$ 3,852,093</u>	<u>\$ 61,756,088</u>

5. ANNUITY PRIZE OBLIGATIONS

The Agency carries long-term annuity prize obligations at present value. Presented below is a summary of long-term annuity prize payment requirements for annuities payable to maturity:

<u>Fiscal Year</u>	<u>Principal</u>	<u>Interest</u>	<u>Total</u>
2017	\$ 4,609,201	\$ 105,793	\$ 4,714,992
2018	3,011,692	243,300	3,254,992
2019	2,856,641	398,351	3,254,992
2020	3,710,560	863,369	4,573,929
2021	2,409,869	632,327	3,042,196
2022-2026	9,339,692	4,097,287	13,436,980
2027-2031	2,533,953	1,562,264	4,096,217
2032-2036	615,015	379,985	995,000
2037-2040	269,500	246,500	516,000
Total	<u>\$ 29,356,123</u>	<u>\$ 8,529,175</u>	<u>\$ 37,885,298</u>

This debt represents annual payments owed to jackpot and lifetime winners. Annuity prizes are paid over a period of time ranging from 20 to 25 years depending on the time period in which the prize was won. The Agency has purchased United States Government Treasury Bonds or annuity contracts that fully fund these obligations.

Long-term liability activity of annuity prize payments for the years ended June 30, 2016 and 2015 was as follows:

<u>Fiscal Year Ending</u>	<u>Beginning Balance</u>	<u>Additions</u>	<u>Reductions</u>	<u>Ending Balance</u>	<u>Due Within One Year</u>
June 30, 2016	\$ 32,046,777	\$ 4,701,505	\$ 7,392,159	\$ 29,356,123	\$ 4,609,201
June 30, 2015	\$ 40,777,882	\$ 2,075,891	\$ 10,806,996	\$ 32,046,777	\$ 7,174,806

6. EMPLOYEE RELATED PAYABLES

Changes in long-term employee related payables were as follows for the years ended June 30, 2016 and 2015. The employee related payables due within one year are included in the current portion of the employee related payables on the accompanying statements of net position, which also includes salaries payable in the amount of \$621,576 and \$821,252 as of June 30, 2016 and 2015, respectively.

	2016		
	Compensated Absences	Workers' Compensation	Combined
Beginning Balance	\$ 1,782,630	\$ 222,000	\$ 2,004,630
Additions	1,169,700	275,865	1,445,565
Reductions	(1,266,487)	(68,865)	(1,335,352)
Ending Balance	<u>\$ 1,685,843</u>	<u>\$ 429,000</u>	<u>\$ 2,114,843</u>
Amount Due Within One Year	\$ 1,170,000	\$ 64,350	\$ 1,234,350
Non-Current Portion	515,843	364,650	880,493
	<u>\$ 1,685,843</u>	<u>\$ 429,000</u>	<u>\$ 2,114,843</u>

	2015		
	Compensated Absences	Workers' Compensation	Combined
Beginning Balance	\$ 1,562,589	\$ 229,000	\$ 1,791,589
Additions	1,095,022	99,970	1,194,992
Reductions	(874,981)	(106,970)	(981,951)
Ending Balance	<u>\$ 1,782,630</u>	<u>\$ 222,000</u>	<u>\$ 2,004,630</u>
Amount Due Within One Year	\$ 700,000	\$ 34,410	\$ 734,410
Non-Current Portion	1,082,630	187,590	1,270,220
	<u>\$ 1,782,630</u>	<u>\$ 222,000</u>	<u>\$ 2,004,630</u>

7. COMMITMENTS AND CONTINGENCIES

LEASES

The Agency leases office space, warehouse facilities, and on-line and instant product equipment over periods extending through July 2023. Rent expense for the years ended June 30, 2016 and 2015 totaled \$1,157,241 and \$1,060,020, respectively. Certain leases contain a bargain purchase option and are accounted for as capital leases.

The assets acquired under capital leases include:

	<u>June 30, 2016</u>	<u>June 30, 2015</u>
Machinery and Equipment	\$ 91,983,613	\$ 91,983,613
Accumulated Amortization	(44,083,611)	(31,253,535)
	<u>\$ 47,900,002</u>	<u>\$ 60,730,078</u>

The following is a schedule of future minimum lease payments under these leases:

Year Ending June 30:	Operating Leases	Capital Leases
2017	\$ 1,132,042	\$ 13,249,883
2018	1,175,341	13,249,935
2019	1,220,473	13,249,915
2020	1,267,252	9,919,753
2021	1,316,013	—
2022	1,366,697	—
2023	703,049	—
Total	\$ 8,180,867	\$ 49,669,486
Less amount representing interest		1,385,061
Present value of minimum lease payments		48,284,425
Less current maturities		13,249,883
Long-term portion of capital lease obligations		<u>\$ 35,034,542</u>

Liability activity for capital leases was as follows for the years ended June 30,:

	<u>2016</u>	<u>2015</u>
Beginning Balance	\$ 60,714,472	\$ 17,480,149
Acquisitions	—	63,866,668
Disposals	—	(17,480,149)
Payments	(12,430,047)	(3,152,196)
Ending Balance	<u>\$ 48,284,425</u>	<u>\$ 60,714,472</u>

8. PARTICIPATION IN THE MULTI-STATE LOTTERY

In July 2014, the Agency became a member of the Multi-State Lottery (MUSL), which operates several jackpot lottery games on behalf of other participating lotteries. The Agency participates in two of these games: Mega Millions and Powerball. MUSL is managed by a Board of Directors, which is comprised of lottery directors or their designee from each of the party states. The Board of Directors' responsibilities to administer these multi-state games are performed by advisory committees or panels staffed by officers and independent contractors appointed by the board. These officers and independent contractors serve at the pleasure of the board and the board prescribes their powers, duties and qualifications. The Executive Committee carries out the budgeting and financing of MUSL, while the board contracts the independent audit.

Each MUSL member sells game tickets through its lottery retailers and makes weekly wire transfers to MUSL in an amount equivalent to the total prize pool less the amount of prizes won in each state. Lesser prizes are paid directly to the winners by each member lottery. The prize pool for Powerball and Mega Millions is 50% of each drawing period's sales, within minimum jackpot levels.

MUSL places a percentage of game sales from each game in separate prize reserve funds that serve as a contingency reserve to protect from unforeseen liabilities. Once the prize reserve funds exceed the designated limit, the excess becomes part of that particular prize pool. Prize reserve fund monies are refundable to the members if MUSL disbands or, after one year, if a member leaves MUSL. The Agency will be withdrawing from MUSL October 31, 2016 and will rejoin the Mega Millions consortium. The Mega Millions consortium is made up of lottery directors from member party states. Unlike MUSL, the consortium does not require reserves. Instead, settlements between states occur after each jackpot win and annually for all other prizes unless non-jackpot prize settlements exceed a specified amount.

The Agency's share of the prize reserve fund balances with MUSL as of June 30, 2016 was as follows (in millions):

	Total Prize Reserve	Agency Share
Powerball	\$ 39,307	\$ 1,425
Mega Millions	38,541	1,297
	<u>\$ 77,848</u>	<u>\$ 2,722</u>

Lottery prize reserves held by MUSL are invested according to a Trust agreement the participating lotteries have with MUSL outlining investment policies. The policies restrict investments to direct obligations of the United States Government, perfected repurchase agreements, and obligations issued or guaranteed as to the payment of principal and interest by agencies or instrumentalities of the United States Government, and mutual funds of approved investments. The average portfolio is never more than one year, except that up to one third of the portfolio may have an average maturity of up to two years. The maximum maturity for any one security does not exceed five years.

9. RETIREMENT BENEFITS

The Agency and its employees contribute to the State Retirement and Pension System (the System). The System is a cost sharing multiple-employer public employee retirement system established by the State to provide pension benefits for State employees. The Agency's only obligation to the System is its required annual contribution. The System is administered by a Board of Trustees in accordance with State Personnel and the Pension Article of the Annotated Code of Maryland. The System prepares a separately audited CAFR, which can be obtained from the State Retirement and Pension System of Maryland, 120 East Baltimore Street, Baltimore, Maryland 21202.

PLAN DESCRIPTIONS

Agency employees are members of the Employees' Retirement and Pension Systems (two of several systems managed by the System's Board of Trustees). The Employees' Retirement System (the Retirement Plan) includes those employees hired prior to January 1, 1980 who have not elected to transfer to the Employees' Pension System (the Pension Plan). Conversely, members of the Pension Plan include those employees hired after January 1, 1980 and prior employees who have elected to transfer from the Retirement Plan.

The Retirement Plan provides retirement, death, and disability benefits to its members. Members of the Retirement Plan are generally eligible for full retirement benefits upon the earlier of attaining age 60 or accumulating 30 years of eligible service regardless of age. The annual retirement allowance equals $1/55$ (1.8%) of the member's highest three-year average final salary (AFS) multiplied by the number of years of accumulated creditable service. A member may retire with reduced benefits after completing 25 years of eligible service. Benefits are reduced by 0.5% per month for each month remaining until the retiree either attains age 60 or would have accumulated 30 years of eligible service, whichever is less. The maximum reduction for a member is 30%. Any member who terminates employment before attaining retirement age but after accumulating five years of eligible service is eligible for a vested retirement allowance.

The Pension Plan provides retirement, death and disability benefits to its members. Certain aspects of eligibility and benefit calculations are different for employee's hired on or after July 1, 2011. Those differences are explained below.

Members of the Pension Plan who were active participants prior to July 1, 2011 are generally eligible for full retirement benefits upon the earlier of attaining age 62, with specified years of eligibility service, or accumulating 30 years of eligibility service regardless of age. Generally, the annual pension allowance for a member equals $1/55$ (1.8%) of the member's AFS, multiplied by the number of years of creditable service. A member may retire with reduced benefits upon attaining age 55 with at least 15 years of eligible service. Any member who terminates employment before attaining retirement age but after accumulating five years of eligible service is eligible for a vested retirement allowance.

9. RETIREMENT BENEFITS (CONTINUED)

Employees hired on or after July 1, 2011 (New Hires) are generally eligible for full retirement benefits based upon the “Rule of 90” which states that the sum of the employee’s age plus eligible service must equal 90 or the employee must be age 65 with 10 years of service. The annual pension allowance for New Hires equals 1.5% of the member’s AFS, multiplied by the number of years of creditable service. AFS for New Hires is calculated using the highest 5 consecutive years. A New Hire may retire with reduced benefits upon attaining age 60 with at least 15 years of eligible service. A New Hire who terminates employment before attaining retirement age but after accumulating ten years of eligible service is eligible for a vested retirement allowance.

FUNDING POLICY

Active members and the employers of the members are required to contribute to the Employees’ Retirement and Pension Systems. The Agency’s required contribution is established by annual actuarial valuations using the entry age normal cost method with projection and other actuarial assumptions adopted by the Board of Trustees. For service earned after July 1, 2011, members of the Employees’ Retirement System and the Employee’s Pension System are required to contribute 7% of earnable compensation.

The Agency contributions, which equal 100% of the required contributions, for the years ended June 30, 2016 and 2015 are as follows:

	2016	2015
Agency contribution	\$2,424,201	\$2,315,584
Percentage of payroll	10.11%	10.21%

GASB NO. 68 – PENSION DISCLOSURES

In June 2012, GASB issued Statement No. 68, *Accounting and Financial Reporting for Pensions — An Amendment of GASB Statement No 27.* GASB Statement No. 68 requires the Agency to recognize the long-term obligations for pension benefits as a liability for the first time on the Statements of Net Position and to more comprehensively and comparatively measure the annual cost of pension benefits.

As of June 30, 2016 and 2015, the Agency reported a liability of \$22,831,103 and \$13,723,698 for its proportionate share of the State of Maryland’s pension liability.

On June 30, 2016 and 2015, the Agency’s proportion of the State of Maryland’s net pension liability of \$19,536,332,680 and \$16,783,079,048, respectively (State pool only) was \$22,831,103 and \$13,723,698 or .117% and .082%, respectively of the total State’s pension liability.

9. RETIREMENT BENEFITS (CONTINUED)

The Agency reported deferred outflows of resources and deferred inflows of resources related to the pensions from the following sources as of June 30, 2016:

	Deferred Outflows of Resources	Deferred Inflows of Resources
Agency's contributions during the year	\$ (2,315,584)	\$ —
Amortization of prior year deferred outflows and inflows	(70,509)	(533,514)
Change of assumptions	1,142,877	—
Change of proportionate share of contributions	5,688,061	—
Net difference between projected and actual earnings on pension plan investments	2,010,945	467,561
Agency's contributions subsequent to the measurement date	2,424,202	—
Total	<u>\$ 8,879,992</u>	<u>\$ (65,953)</u>

The Agency's contributions of \$2,424,202 reported as deferred outflows of resources related to pensions resulted from contributions subsequent to the measurement date. This amount will be recognized as a reduction in the net pension liability for the year ended June 30, 2017.

The Agency reported deferred outflows of resources and deferred inflows of resources related to the pensions from the following sources as of June 30, 2015:

	Deferred Outflows of Resources	Deferred Inflows of Resources
Change of assumptions	\$ 198,524	\$ —
Net difference between projected and actual earnings on pension plan investments	—	1,502,148
Agency's contributions subsequent to the measurement date	2,315,584	—
Total	<u>\$ 2,514,108</u>	<u>\$ 1,502,148</u>

9. RETIREMENT BENEFITS (CONTINUED)

Other amounts reported as deferred outflows of resources and deferred inflows of resources related to the pensions will be recognized in pension expense as follows:

Year End June 30,	2016 Balanced Amortization				2015 Balanced Amortization	
	Deferred Outflows			Deferred Inflows	Deferred Outflow	Deferred Inflow
	Net Difference in Investment Earnings	Change in Assumptions	Change in Proportionate Share of Contributions	Actual and Expected Experience	Change in Assumptions	Net Difference in Investment Earnings

Assumptions and Other Inputs:

Valuation method	Individual Entry Age Normal Cost Method
Amortization method	Level Percentage of Payroll, Closed
Salary increases.....	3.45% to 10.70% including inflation
Inflation	2.95% general, 3.45% wage
Investment rate of return	7.55%
Discount rate	7.55%
Retirement age.....	Experienced-based table of rates that are specific to the type of eligibility condition. Last updated for the 2015 valuation pursuant to an experience study of the period 2010-2014.
Mortality	RP-2014 Mortality Tables with generational mortality projections using scale MP-2014, calibrated to MSRPS experience.

Discount Rate

A single discount rate of 7.55% was used to measure the total pension liability. This single discount rate was based on the expected rate of return on pension plan investments of 7.55%. The projection of cash flows used to determine this single discount rate assumed that plan member contributions will be made at the current contribution rate and that employer contributions will be made at rates equal

9. RETIREMENT BENEFITS (CONTINUED)

to the difference between actuarially determined contribution rates and the member rate. Based on these assumptions, the pension plan's fiduciary net position was projected to be available to make all projected future benefit payments of current plan members. Therefore, the long-term expected rate of return on pension plan investments was applied to all periods of projected benefit payments to determine the total pension liability.

10. OTHER POST-EMPLOYMENT BENEFITS

Members of the State Retirement and Pension Systems and their dependents are provided postemployment health care benefits through the State Employee and Retiree Health and Welfare Benefits Program (Plan). The Plan is a single-employer defined benefit health care plan established by the State Personnel and Pensions Article, Section 2-501 through 2-516 of the Annotated Code of Maryland. The Plan is self-insured to provide medical, hospitalization, prescription drug and dental insurance benefits to eligible state employees, retirees, and their dependents. A separate valuation is not performed for the Agency. The Agency's only obligation to the Plan is its required annual contribution.

Effective June 1, 2004, the State established the Postretirement Health Benefits Trust Fund (OPEB Trust) to receive appropriated funds and contributions to assist the Plan in financing the State's post-employment health insurance subsidy. The OPEB Trust is established in accordance with the State Personnel and Pensions Article, Section 34-101 of the Annotated Code of Maryland and is administered by the Board of Trustees for the State Retirement and Pension System. The Board of Trustees prepares a financial report for the OPEB Trust, which can be obtained from the State Retirement and Pension System of Maryland, 120 E. Baltimore Street, Suite 1600, Baltimore, Maryland 21202.

PLAN DESCRIPTION

Agency employees are members of the Plan. Members, generally, may enroll and participate in the health benefit options upon retirement if the retiree ended State service with at least 10 years of creditable service and within five years before the age at which a vested retirement allowance normally would begin or if the retiree ended State service with at least 16 years of creditable service.

FUNDING POLICY

Based on current practice, the State subsidizes approximately 50% to 85% of covered medical, dental, prescription, and hospitalization costs, depending on the type of insurance plan. The State assesses a surcharge for postemployment health care benefits, which is based on health care insurance charges for current employees. Costs for post retirement benefits are for State of Maryland retirees. The State does not distinguish employees by employer/State agency. Instead, the State allocates the postemployment health care costs to all participating employers. The cost of these benefits is expensed when paid. For the years ended June 30, 2016 and June 30, 2015, the State did not allocate postemployment health care costs to participating employers and as a result no contribution was made by the Agency.

11. RISK MANAGEMENT

The Agency is exposed to various risks associated with the theft, damage, or destruction of assets, torts, and game liability. To manage the related risks, the Agency participates in the State's insurance program, which provides general liability, personal and casualty, and workers' compensation insurance. The program requires all agencies to submit premiums based upon proportionate payroll costs and/or claim history. This insurance covers related losses up to a maximum of \$1,000,000 per event. Settlements have not exceeded coverage for any of the past three fiscal years. The activity related to accrued workers' compensation costs is included in the schedule exhibited in Note 6.

To minimize risks associated with lottery game liabilities, the Agency has established aggregate payout limits for each game type. This approach discontinues sales of the daily numbers games once the potential liability limit is reached for a specific player selection. A maximum payout limit is established for those games with a first-tier prize, which requires multiple first-tier winners to split the related prize.

Risk is minimized for gaming operations as the law requires a VLT to have an average payout of 87% or more but does not exceed 100%. A casino's gaming floor is to be configured to collectively achieve, at all times, an average payout of 87% and which does not exceed 95%. For table games, any overall loss for the day is absorbed by the casinos.

SCHEDULE OF REVENUES, EXPENSES AND CHANGES IN NET POSITION — BUDGET AND ACTUAL

1. BUDGETING AND BUDGETARY CONTROL

The Maryland Constitution requires the Governor to submit to the General Assembly an annual balanced budget for the following fiscal year. Each year the Agency prepares its annual budget and submits it to the Governor. The Governor then presents the State's annual budget (including the Agency's) to the General Assembly in accordance with Constitutional requirements. The General Assembly is required to then enact a balanced budget.

The Agency's official budget, as adopted by the Legislature, is based upon accounting for certain transactions on the basis of cash receipts and disbursements. Encumbrance accounting, under which purchase orders, contracts, and other commitments for expenditures are recorded as expenditures when the purchase commitment is made, is employed for budgetary purposes. Unliquidated encumbrances are canceled at year-end if it is determined the funds will not be utilized in the future. Unencumbered appropriations lapse at the end of the fiscal year for which they were appropriated. The major differences between the budget basis and the Accounting Principles Generally Accepted in the United States of America (GAAP) basis of accounting are:

- Lottery player prize payments are not budgeted;
- Lottery retailer commissions are not budgeted;
- Casino operator commissions are not budgeted;
- Revenues are recorded when received in cash (budget) as opposed to when earned (GAAP);
- Expenses (including deferred prizes) are recorded when paid or encumbered (budget) as opposed to when the liability is incurred (GAAP);
- The budget basis excludes depreciation and amortization.

The Agency maintains budgetary control by not permitting the total expenditures to exceed appropriations without executive and legislative branch approval.

INDEPENDENT AUDITORS' REPORT ON INTERNAL CONTROL OVER FINANCIAL REPORTING AND ON COMPLIANCE AND OTHER MATTERS BASED ON AN AUDIT OF FINANCIAL STATEMENTS PERFORMED IN ACCORDANCE WITH *GOVERNMENT AUDITING STANDARDS*

To the Maryland Lottery and Gaming Control Agency:

We have audited, in accordance with the auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards* issued by the Comptroller General of the United States, the financial statements of the business-type activities of the Maryland Lottery and Gaming Control Agency (an agency of the State of Maryland) (Agency), as of and for the year ended June 30, 2016, and the related notes to the financial statements, which collectively comprise the Maryland Lottery and Gaming Control Agency's basic financial statements, and have issued our report thereon dated September 30, 2016.

INTERNAL CONTROL OVER FINANCIAL REPORTING

In planning and performing our audit, we considered the Maryland Lottery and Gaming Control Agency's internal control over financial reporting (internal control) to determine the audit procedures that are appropriate in the circumstances for the purpose of expressing our opinion on the financial statements, but not for the purpose of expressing an opinion on the effectiveness of the Maryland Lottery and Gaming Control Agency's internal control. Accordingly, we do not express an opinion on the effectiveness of the Maryland Lottery and Gaming Control Agency's internal control over financial reporting.

A *deficiency in internal control* exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct misstatements on a timely basis. A *material weakness* is a deficiency, or a combination of deficiencies, in internal control, such that there is a reasonable possibility that a material misstatement of the entity's financial statements will not be prevented, or detected and corrected on a timely basis. A *significant deficiency* is a deficiency, or a combination of deficiencies, in internal control that is less severe than a material weakness, yet important enough to merit attention by those charged with governance.

Our consideration of internal control was for the limited purpose described in the first paragraph of this section and was not designed to identify all deficiencies in internal control that might be material weaknesses or significant deficiencies. Given these limitations, during our audit we did not identify any deficiencies in internal control that we consider to be material weaknesses. However material weaknesses may exist that have not been identified.

COMPLIANCE AND OTHER MATTERS

As part of obtaining reasonable assurance about whether the Maryland Lottery and Gaming Control Agency's financial statements are free of material misstatement, we performed tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements, noncompliance with which could have a direct and material effect on the determination of financial statement amounts. However, providing an opinion on compliance with those provisions was not an objective of our audit, and accordingly, we do not express such an opinion. The results of our tests disclosed no instances of noncompliance or other matters that are required to be reported under *Government Auditing Standards*.

PURPOSE OF THIS REPORT

The purpose of this report is solely to describe the scope of our testing of internal control and compliance and the results of that testing, and not to provide an opinion on the effectiveness of the entity's internal control or on compliance. This report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering the entity's internal control and compliance. Accordingly, this communication is not suitable for any other purpose.

Stout, Casey & Horning, P.A.

MARYLAND LOTTERY AND GAMING CONTROL AGENCY, AN ENTERPRISE FUND OF THE STATE OF MARYLAND
Comprehensive Annual Financial Report for the Years Ended June 30, 2016 and 2015.

STATISTICAL SECTION

SINCE ITS INCEPTION IN 1973, THE MARYLAND LOTTERY HAS CONTRIBUTED MORE THAN \$14.3 BILLION IN REVENUE TO THE STATE OF MARYLAND. MARYLAND'S CASINO PROGRAM, WHICH BEGAN IN SEPTEMBER 2010, HAS GENERATED MORE THAN \$1.98 BILLION IN REVENUE, WITH MORE THAN \$1.55 BILLION SUPPORTING EDUCATION IN THE STATE.

COMPREHENSIVE ANNUAL FINANCIAL REPORT
FOR THE YEARS ENDED JUNE 30, 2016 and 2015
ENTERPRISE FUND OF THE STATE OF MARYLAND

This section of the Comprehensive Annual Financial Report presents detailed information as a supplement to the information presented in the financial statements and note disclosures to assist readers in assessing the overall financial health of the MLGCA.

CONTENTS

FINANCIAL TRENDS 81

These schedules contain trend information to help readers understand how the MLGCA's financial performance and position have changed over time. The information presented includes changes in net position, sales and contribution/transfer data for both the lottery and gaming operations, as well as the lottery industry as a whole.

REVENUE CAPACITY 104

These schedules contain information to help readers assess the MLGCA's most significant revenue sources. The lottery's statewide retailer network determines the market exposure for the lottery's games. The casinos determine the market exposure for VLTs and table games.

DEBT CAPACITY 115

This schedule presents information to help readers assess the debt burden and the ability to issue additional debt in the future.

DEMOGRAPHIC AND ECONOMIC INFORMATION 116

These schedules offer demographic and economic indicators to help readers understand the environment within which the MLGCA operates.

OPERATING INFORMATION 117

These schedules contain information about the MLGCA's organization and efficiency.

Sources: Unless otherwise noted, the information in these schedules is derived from the comprehensive annual financial reports or the audited financial statements for the relevant year.

MARYLAND LOTTERY AND GAMING CONTROL AGENCY
