

June 16, 2017

Mr. Gordon Medenica
Director
Maryland State Lottery and Gaming Control Agency
1800 Washington Blvd. Suite 330
Baltimore, MD 21230

Director Medenica:

Pursuant to COMAR regulation 36.03.11.05 "Gaming Floor Plan" and via this correspondence, Live! Casino & Hotel, respectfully submits this request to change the facility's Gaming Floor Plan and related documents. If the proposed project is approved Live! Casino & Hotel would begin mid-August 2017 and be completed by the end of August 2017.

I. Proposed Facility Layout

Please see attached (layouts)

II. Amenities

Live! Casino & Hotel continuously strives to redefine what the casino experience can be for its customers. One key measure in meeting this goal is to increase customer satisfaction by offering a varied and diverse array of gaming choices and amenities that meet our customer's needs. Thirteen (13) additional video lottery terminals located on the outdoor patio will enrich our customer's overall entertainment experience. In addition to the video lottery terminals, Live! Casino & Hotel may offer other conveniences and amenities that customers have come to expect.

III. Affidavit from Chief Executive Officer

Please see attached (Travis Lamb)

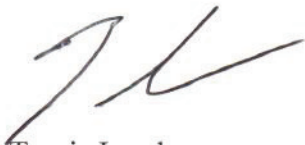

IV. Plan for Player & Equipment Safety

Live! Casino and Hotel is committed to providing the highest standards of customer care and an exciting entertainment gaming venue. In our continued pledge to our patrons, we will continue to

ensure the safety of patrons and equipment from inclement/severe weather.

- Power and data feeds to extend from the furthest wall/ceiling location and be mounted on the wall perpendicular to the proposed machine configuration, inside of Slot bases, above floor and hidden from elements and patrons
- Materials used will be of outdoor type and quality to prevent elemental interference and orientation/placement to deter tampering
- During monitored weather activity, covers designed for video lottery terminals and chairs will be used, placing the video lottery terminals out of service or a combination of the two in case of rain, sleet, snow, ice collection or other abnormal weather events
- Designated video lottery terminals will be a part of and undergo a cyclic Preventative Maintenance Program that is currently in use for the rest of the floor to ensure complete operations and frequent inspection of all facets of the units to verify full operational readiness and material conditioning.

Thank you in advance for your consideration of this matter. Should you have any questions regarding this request, please feel free to contact me.
